Final Year Project Report

Department of Computer Engineering

HITEC University, Taxila

Fall 2020

Declaration

We, hereby declare that this project neither as a whole nor as a part there of has been copied out from any source. It is further declared that we have developed this project and the accompanied report entirely on the basis of our personal efforts made under the sincere guidance of our supervisor. No portion of the work presented in this report has been submitted in the support of any other degree or qualification of this or any other University or Institute of learning. If any violation is found in this FYP report, we will be liable to be punished under the plagiarism rules of HEC.

HITEC University, Taxila

Fall 2017

Dedication

In this page you can dedicate your project to which you want to dedicate your work.

Department of Computer Engineering
HITEC University, Taxila
Project Title

Names	Presented by	Roll No
-------	--------------	---------

In partial fulfilment of the four years **B.S. Computer Engineering** requirements, HITEC University Taxila, Pakistan underneath the supervision of its project adviser as well as authorized by the project review board has been recognized.

Supervisor's Name

Lecturer, Project Advisor

Head of Department Name

Chairman

Department of Computer Engineering

Acknowledgement

In this page you are advised to give appreciation to those teachers who have helped you during your projects, and also the name of those who have guide you through out your project thesis, evaluation.

Abstract

An abstract is a brief summary of a research article, thesis, review, conference proceeding or any in-depth analysis of a particular subject or discipline, and is often used to help the reader quickly ascertain the paper's purpose. When used, an abstract always appears at the beginning of a manuscript or typescript, acting as the point-of-entry for any given academic paper or patent application. Abstracting and indexing services for various academic disciplines are aimed at compiling a body of literature for that particular subject. The terms *précis* or synopsis are used in some publications to refer to the same thing that other publications might call an "abstract". In management reports, an executive summary usually contains more information (and often more sensitive information) than the abstract does.

TABLE OF CONTENTS

1	Introduction	1
1.1	Some Important Points	1

1

LIST OF ABBREVIATIONS

1G	First generation
2D	Two dimensional
3-D	Three dimensional
4G	Fourth generation
ABW	Absolute bandwidth
API	Application programming interface
CAD	Computer aided design
DAA	Detect and Avoid
dB	Decibels
ECC	Electronic communications committee
ETRI	Electronics and Telecommunications Research Institute
FBW	Fractional bandwidth
FCC	Federal communications commission
FDTD	Finite difference time domain
FEM	Finite element method
FIT	Finite integration technique
FNBW	First null beam width
GA	Genetic algorithm
GHz	Giga hertz
HPBW	Half power beamwidth
IDA	Infocomm development authority
ISM	Industrial Scientific and Medicine
ITU	International telecom union
MATLAB	Matrix laboratory
MIC	Ministry of Internal Affairs and Communications
mm	Millimeter

Chapter One

INTRODUCTION

This is chapter one of report. It contains some general format rules, which ought to be followed. Do not change the format, follow this one as it is.

1.1 Some Important Points

- Do not change headings size or font.
- Do not change the line spacing or font or size for normal text and for whole document.
- When using bullets, do not add line space
- At start of each chapter you have to write chapter number in English, as written above and then leave two blank lines of “Times New Roman” size 12. Then write chapter name with number as shown above in “Times New Roman” size 18.
- Make sure you have selected page size “A4” before printing and also tell the printing shop not to change the page margins. It is your responsibility to print the report in proper format, with proper page margins.
- On side of your hard binding you have to write only your FYP title, along with your group number.
- Make sure the equations are properly numbered. A sample of equation numbering is given in this document. Equation should be in center of page and equation number should be at right most location in small parenthesis, e.g. (x.y). Here “x” is chapter number and “y” is equation number of that specific chapter.
- Similarly make sure that figures and tables are properly numbered and cited (if you have taken them from any other source). Caption of figure is at end and written as “Figure x-y”, where “x” is chapter number and “y” is figure number of that specific chapter. Tables will follow same format, however, caption for table is on top.
- You are required to write a dedicated chapter titled “Impact of project on environment and society” after discussing results of your project. In environment part, you are required to write impact of your project on environment and sustainability, and in society part you are required to write impact of your project on our society.
- Make sure to use the proper page number as used in this document.

Start writing introduction from here.

The report is distributed in the following manner.

Chapter 2: This chapter presents the literature survey, which includes the overview from different publications.

Chapter 3:.

Chapter 4:.

Chapter 5:.

Chapter 6: This chapter deals with the implementation aspects and the software specifications...

Chapter 7:.

Chapter 8: This chapter extracts the conclusion of the research and offers suggestions for future attempts in this area.

Chapter Two

LITERATURE SURVEY

Chapter Three

METHODOLOGY

Chapter Four

SIMULATION AND RESULTS (IF ANY)

Chapter Five

ENVIRONMENT AND SUSTAINABILITY

Chapter Six

CONCLUSION

REFERENCES

List and number all bibliographical references in 12-point Times, single-spaced, at the end of your paper. When referenced in the text, enclose the citation number in square brackets, for example: [1]. Where appropriate, include the name(s) of editors of referenced books. The template will number citations consecutively within brackets [1]. The sentence punctuation follows the bracket [2]. Refer simply to the reference number, as in “[3]”—do not use “Ref. [3]” or “reference [3]”. Do not use reference citations as nouns of a sentence (e.g., not: “as the writer explains in [1]”).

Unless there are six authors or more give all authors’ names and do not use “et al.”. Papers that have not been published, even if they have been submitted for publication, should be cited as “unpublished” [4]. Papers that have been accepted for publication should be cited as “in press” [5]. Capitalize only the first word in a paper title, except for proper nouns and element symbols.

For papers published in translation journals, please give the English citation first, followed by the original foreign-language citation [6].
