

Final Year Project – Proposal Presentation

[Project Title]

By

[Name1 – 12-CS-xx] [Reg No should be in sequence 1,2,3.. not 3,1,2]

[Name2 – 12-CS-xx]

[Name3 – 12-CS-xx]

Supervisor: [Supervisor's Name]

Outline

- [The following is usual outline of any presentation. It is recommended to have at most **9-12 slides in total** to finish within 10 min allocated time.]
- Introduction
- Objective, Problem Statement
- Literature Review(if research based)/Background/Market Survey(if project is product based)-Table
- Proposed Design Methodology/Framework/Architecture
- Hardware/Software Tools
- Proposed Work Plan (Gant Chart)

Introduction

- **Try to squeeze in one slide**
- [Brief opening statements related to project domain with emphasis on why it's a important era]

Problem Statement

- **Try to squeeze in one slide (one or two lines)**
- [Objective of the project in reference to the introduction slide]
- [Precise problem statement]
- Objectives start from following rubrics:
Study/Identify/Develop/Compare/Analyze

Literature Review/Background

- **Try to squeeze in one slide**
- [In case of research problem, list few published work, Must be in tabular form]
- [elsewise (for product based project), already developed software architectures, applications, prototypes available in market etc. Must be in Tabular form]
- **Remember!! It should be totally related to the problem statement mentioned in the previous slide.**

Proposed Design Methodology/Framework/Architecture

- **Try to squeeze in 2-3 slides**

- This part could be of listed below items, must consult your supervisor if any hurdles.
- [Abstract design]
- [Component level designs]
- [SRS]
- Etc.
- **Use Equation Editor to insert the equations. Diagrams/Images should be of good quality and visible to everyone. Bigger diagrams must be redesigned to fit-in the slide or split in two.**

Hardware/Software Tools

- **Try to squeeze in one slide**

1. **Do mention software/hardware tools which will be used to implement proposed methodology.**
2. **Why you decided to choose the mentioned tools?**
3. **What were other options?**

Proposed Work Plan

- Try to squeeze in 1-2 slides
- Identify the project modules/features/tasks/activities
- Time needed to implement each module/feature/task/activity
- Semester-wise workload plan of each member of the project
- Must be in a Gant chart

References

- List down all references/weblinks/videolinks in Chicago format
