

Final Year Project Report

Title of Project

Submitted by:

Student Name 1
Student Registration#

Student Name 2
Student Registration#

Supervisor Name:

Name

Designation

Dated:

12th October, 2023

**Department of Computer Engineering,
HITEC University, Taxila**

Contents

1. Introduction:	3
2. Problem Statement:	3
3. Literature Review/Background	3
4. Proposed Design Methodology/Framework/Architecture	3
5. Hardware/Software Tools	3
6. Proposed Work Plan	3
5. Conclusion	4
6. References	4

1. Introduction:

- 1) Try to squeeze in one or two paragraphs
- 2) [Brief opening statements related to project domain with emphasis on why it's a important era]

2. Problem Statement:

- 1) Try to squeeze in one short paragraph (strictly only one paragraph)
- 2) [Objective of the project in reference to the introduction paragraph]
- 3) [Precise problem statement]
- 4) Objectives start from following rubrics: Study/Identify/Develop/Compare/Analyze
- 5) Discuss the business scope of the proposed solution where you should be mentioned who are the end user of this proposed system

3. Literature Review/Background

- 1) Try to squeeze in one or two paragraphs and Table
- 2) [In case of research problem, list few published work (recent ones), Must be in tabular form]

Ref #	Published Year	Methodology	Results/Findings	Parameters	Gaps/Shortcomings
[1]	2022				
[4]	2023				

Table 1: Literature Review Comparison

- 3) [Elsewise (for product based project), already developed software architectures, applications, prototypes available in market etc. Must be in tabular form] Comparison of Proposed System with existing system in the form of table. Following Table format can be used as example (for details, contact your supervisor).

Functionality	Proposed System	Existing Systems		
	Name	System name 1	System name 2	System name 3
Ease of Use	Yes	No	No	
Security	yes	No	yes	

Table 2: Comparison of Proposed system with existing systems

- 4) Remember!! It should be totally related to the problem statement mentioned in the previous section.

4. Proposed Design Methodology/Framework/Architecture

- 1) Try to squeeze in 2-3 paragraphs.
- 2) This part could be of listed below items, must consult your supervisor if any hurdles.

[Abstract design]

[Component level designs]

[SRS]

Etc.

- 3) Use Equation Editor to insert the equations. Diagrams/Images should be of good quality and visible to everyone. Bigger diagrams must be redesigned to fit-in the page or split in two.

5. Hardware/Software Tools

Try to squeeze in one or two lists

1. Do mention software/hardware tools which will be used to implement proposed methodology.
2. Why you decided to choose the mentioned tools?

3. What were other options?

6. Proposed Work Plan

1. Identify the project modules/features/tasks/activities
2. Time needed to implement each module/feature/task/activity
3. Semester-wise workload plan of each member of the project
4. Must be in a Gant chart

5. Conclusion

Write down the conclusion of this report in one paragraph.

6. References

List down all references/weblinks/videolinks in **Chicago** format
