

Moonshot Projects

Tiger Teams/X-Teams

Ideate → Innovate

- Innovation Lab: A dedicated space or team for developing new and innovative ideas, similar to a laboratory.

An example of an innovation lab is the Google X Lab, which is responsible for developing innovative technologies such as self-driving cars and Google Glass.

- Idea Incubator: A space or team that fosters the growth and development of new ideas until they are ready to be implemented.

An example of an idea incubator is Y Combinator, a startup accelerator that provides funding, mentorship, and resources to help startups develop and grow their ideas.

- **Stealth Project:** A secret project that is being developed in secrecy and away from the mainstream company operations.

An example of a stealth project is Apple's development of the original iPhone, which was kept under wraps and developed in secret until it was ready to be announced and launched.

An example of a breakthrough factory is the innovation lab at Tesla, which is responsible for developing new and innovative electric vehicles and technologies.

- Breakthrough Factory: A dedicated space or team that focuses on generating breakthrough ideas that can change the industry.

- Ideas Accelerator: This phrase implies a team or space that accelerates the development and implementation of new ideas to bring them to market quickly.

An example of an ideas accelerator is Techstars, a startup accelerator that provides mentorship, funding, and resources to help startups bring their ideas to market quickly.

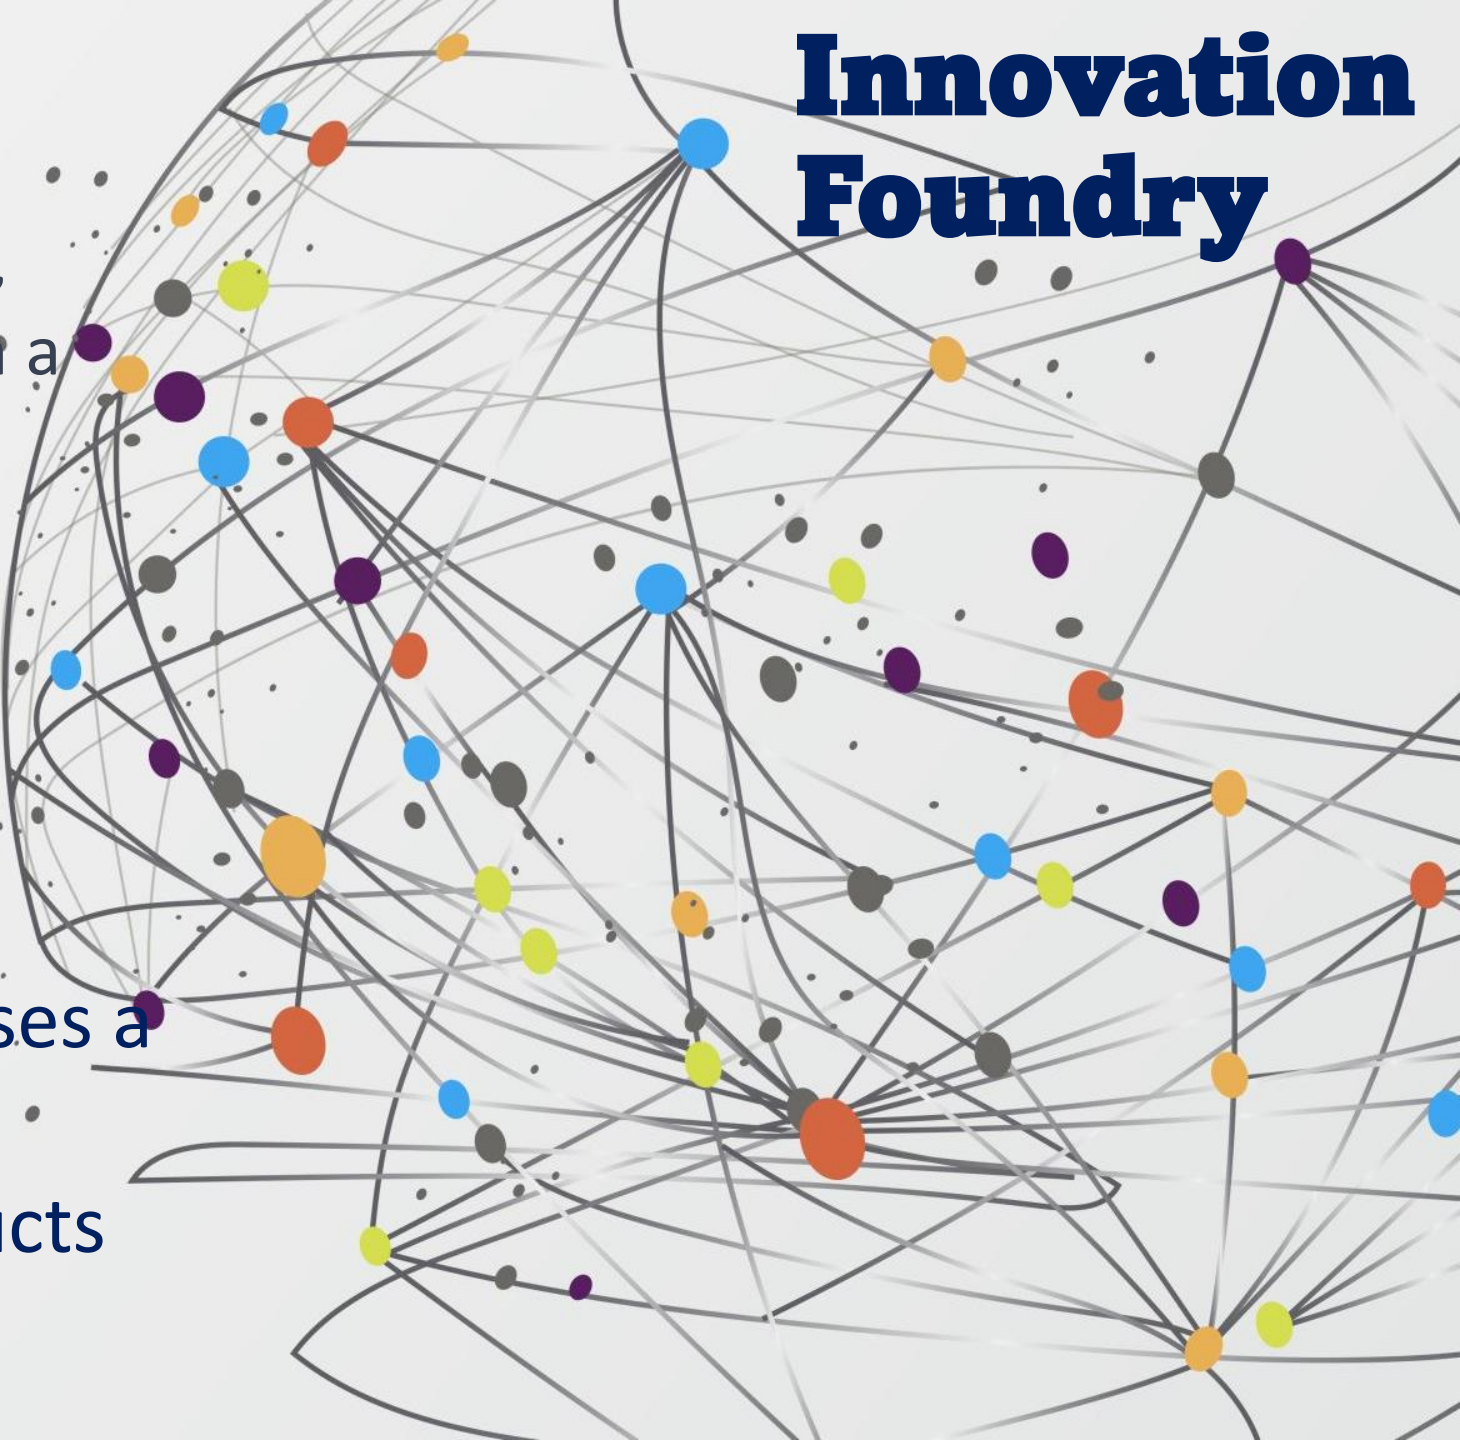

- Creative Forge: A place where ideas are forged and developed with creativity and innovation.

An example of a creative forge is Pixar Animation Studios, which is known for its innovative and creative approach to animation and storytelling.

- **Intrapreneurship Hub:** This phrase implies a dedicated space or team that supports and fosters intrapreneurship, or entrepreneurship within an existing company.

An example of an intrapreneurship hub is Google's "20% time" policy, which allows employees to spend 20% of their work time on projects of their own choosing, often leading to innovative new ideas and products.

Innovation Foundry

A place where ideas are developed, refined, and brought to life through a process similar to the creation of a product in a foundry.

An example of an innovation foundry is IDEO, a design and innovation consultancy that uses a creative, iterative process to develop innovative new products and services for its clients.
