

HITEC UNIVERSITY
Heavy Industries Taxila Education City, Taxila Cantt-Pakistan
Department of Computer Engineering
Assignment 4 (Session-2021), Spring-2025 Semester
Subject: EE-482: Network Security and Cryptography

Deadline

Total Marks = 50

- *This is a complex engineering problem (CEP) based assignment.*
- Your assignment must be submitted in hard form before or on 1st July 2025.

Question 1: [CLO-3, C4: PLO-4]

[30 Marks]

A small private healthcare organization has contracted you to **test** the requirements of encryption in their information systems and to develop a robust policy for its use. Write a formal report outlining your findings and presenting your recommendations.

Question 2: [CLO-3, C4: PLO-4]

[20 Marks]

James and Alexander are having a debate about Public Key Infrastructure (PKI). James says that it is simply a way of authenticating users. However, Alexander argues that it is a type of encryption algorithm. They have asked you to **examine** who is correct. Briefly outline the purpose of PKI. You should also explain what is meant by a certificate authority and digital certificate.

Course Instructor: Engr. Tehseen Ahsan
