

Lesson no 11

Environmental ethics

Introduction

- Moral Issues concerning the environment
- Moral perspectives, Beliefs, or attitudes concerning those Issues
- ❖ Engineers in the past are Known for their negligence of environment, in their activities. It has become important now that engineers design eco –friendly tools, Machines, sustainable Products, and Process, and projects

These are essential now to

- Ensure protection(safety) of environment
- Prevent the degradation of environment
- Slow down the exploitation of the natural resources

So that the future generation can survive

Example: Compaq computer corporation(now merged with HP) was the leader, who exhibited their commitments to environmental health, through implementation of the concept of 'Design for environment' on their products, unified standards all over the world Units, and giving priority to vendors with a record of environmental concern

Engineers duties towards environmental ethics

- Environmental impact assessment
- One major but Sure and unintended effect of technology is wastage and the resulting pollution of Land, water, air and even space.
- Study how the industry and technology affects the environment
- Establish Standards
- Study and to fix the tolerable and actual pollution levels

- Counter measures

- Study what the protective or eliminating measures are available for immediate implementation

- Environmental awareness

- Study on how to educate the people on environmental Practices, Issues, and possible remedies

Disasters

Plastic waste Disposal

Industrial waste Disposal

Global warming(Climate change)

Depletion of Ozone Layer

Acid Rain
