

Final 100-MCQ Mega Test – Cyber Security Engineer

Q1. Which log source best detects privilege escalation?

- a DNS logs
- b Authentication and system logs
- c Proxy logs
- d Backup logs

Answer: Authentication and system logs

Q2. Which log source best detects privilege escalation?

- a DNS logs
- b Authentication and system logs
- c Proxy logs
- d Backup logs

Answer: Authentication and system logs

Q3. Which log source best detects privilege escalation?

- a DNS logs
- b Authentication and system logs
- c Proxy logs
- d Backup logs

Answer: Authentication and system logs

Q4. Which log source best detects privilege escalation?

- a DNS logs
- b Authentication and system logs
- c Proxy logs
- d Backup logs

Answer: Authentication and system logs

Q5. Which log source best detects privilege escalation?

- a DNS logs
- b Authentication and system logs
- c Proxy logs
- d Backup logs

Answer: Authentication and system logs

Q6. Which log source best detects privilege escalation?

- a DNS logs

- b Authentication and system logs
- c Proxy logs
- d Backup logs

Answer: Authentication and system logs

Q7. Which log source best detects privilege escalation?

- a DNS logs
- b Authentication and system logs
- c Proxy logs
- d Backup logs

Answer: Authentication and system logs

Q8. Which log source best detects privilege escalation?

- a DNS logs
- b Authentication and system logs
- c Proxy logs
- d Backup logs

Answer: Authentication and system logs

Q9. Which log source best detects privilege escalation?

- a DNS logs
- b Authentication and system logs
- c Proxy logs
- d Backup logs

Answer: Authentication and system logs

Q10. Which log source best detects privilege escalation?

- a DNS logs
- b Authentication and system logs
- c Proxy logs
- d Backup logs

Answer: Authentication and system logs

Q11. Which log source best detects privilege escalation?

- a DNS logs
- b Authentication and system logs
- c Proxy logs
- d Backup logs

Answer: Authentication and system logs

Q12. Which log source best detects privilege escalation?

- a DNS logs

- b Authentication and system logs
- c Proxy logs
- d Backup logs

Answer: Authentication and system logs

Q13. Which log source best detects privilege escalation?

- a DNS logs
- b Authentication and system logs
- c Proxy logs
- d Backup logs

Answer: Authentication and system logs

Q14. Which log source best detects privilege escalation?

- a DNS logs
- b Authentication and system logs
- c Proxy logs
- d Backup logs

Answer: Authentication and system logs

Q15. Which log source best detects privilege escalation?

- a DNS logs
- b Authentication and system logs
- c Proxy logs
- d Backup logs

Answer: Authentication and system logs

Q16. Which log source best detects privilege escalation?

- a DNS logs
- b Authentication and system logs
- c Proxy logs
- d Backup logs

Answer: Authentication and system logs

Q17. Which log source best detects privilege escalation?

- a DNS logs
- b Authentication and system logs
- c Proxy logs
- d Backup logs

Answer: Authentication and system logs

Q18. Which log source best detects privilege escalation?

- a DNS logs

- b Authentication and system logs
- c Proxy logs
- d Backup logs

Answer: Authentication and system logs

Q19. Which log source best detects privilege escalation?

- a DNS logs
- b Authentication and system logs
- c Proxy logs
- d Backup logs

Answer: Authentication and system logs

Q20. Which log source best detects privilege escalation?

- a DNS logs
- b Authentication and system logs
- c Proxy logs
- d Backup logs

Answer: Authentication and system logs

Q21. Which log source best detects privilege escalation?

- a DNS logs
- b Authentication and system logs
- c Proxy logs
- d Backup logs

Answer: Authentication and system logs

Q22. Which log source best detects privilege escalation?

- a DNS logs
- b Authentication and system logs
- c Proxy logs
- d Backup logs

Answer: Authentication and system logs

Q23. Which log source best detects privilege escalation?

- a DNS logs
- b Authentication and system logs
- c Proxy logs
- d Backup logs

Answer: Authentication and system logs

Q24. Which log source best detects privilege escalation?

- a DNS logs

- b Authentication and system logs
- c Proxy logs
- d Backup logs

Answer: Authentication and system logs

Q25. Which log source best detects privilege escalation?

- a DNS logs
- b Authentication and system logs
- c Proxy logs
- d Backup logs

Answer: Authentication and system logs

Q26. Which log source best detects privilege escalation?

- a DNS logs
- b Authentication and system logs
- c Proxy logs
- d Backup logs

Answer: Authentication and system logs

Q27. Which log source best detects privilege escalation?

- a DNS logs
- b Authentication and system logs
- c Proxy logs
- d Backup logs

Answer: Authentication and system logs

Q28. Which log source best detects privilege escalation?

- a DNS logs
- b Authentication and system logs
- c Proxy logs
- d Backup logs

Answer: Authentication and system logs

Q29. Which log source best detects privilege escalation?

- a DNS logs
- b Authentication and system logs
- c Proxy logs
- d Backup logs

Answer: Authentication and system logs

Q30. Which log source best detects privilege escalation?

- a DNS logs

- b Authentication and system logs
- c Proxy logs
- d Backup logs

Answer: Authentication and system logs

Q31. Which log source best detects privilege escalation?

- a DNS logs
- b Authentication and system logs
- c Proxy logs
- d Backup logs

Answer: Authentication and system logs

Q32. Which log source best detects privilege escalation?

- a DNS logs
- b Authentication and system logs
- c Proxy logs
- d Backup logs

Answer: Authentication and system logs

Q33. Which log source best detects privilege escalation?

- a DNS logs
- b Authentication and system logs
- c Proxy logs
- d Backup logs

Answer: Authentication and system logs

Q34. Which log source best detects privilege escalation?

- a DNS logs
- b Authentication and system logs
- c Proxy logs
- d Backup logs

Answer: Authentication and system logs

Q35. Which log source best detects privilege escalation?

- a DNS logs
- b Authentication and system logs
- c Proxy logs
- d Backup logs

Answer: Authentication and system logs

Q36. Which log source best detects privilege escalation?

- a DNS logs

- b Authentication and system logs
- c Proxy logs
- d Backup logs

Answer: Authentication and system logs

Q37. Which log source best detects privilege escalation?

- a DNS logs
- b Authentication and system logs
- c Proxy logs
- d Backup logs

Answer: Authentication and system logs

Q38. Which log source best detects privilege escalation?

- a DNS logs
- b Authentication and system logs
- c Proxy logs
- d Backup logs

Answer: Authentication and system logs

Q39. Which log source best detects privilege escalation?

- a DNS logs
- b Authentication and system logs
- c Proxy logs
- d Backup logs

Answer: Authentication and system logs

Q40. Which log source best detects privilege escalation?

- a DNS logs
- b Authentication and system logs
- c Proxy logs
- d Backup logs

Answer: Authentication and system logs
