

SOC & SIEM – Quick Revision Cheat Sheet

SOC Core Responsibilities

- 24/7 monitoring and alert triage
- Incident detection, analysis, and response
- Threat hunting and continuous improvement
- Documentation and reporting

Incident Response Lifecycle

- Identification
- Containment
- Eradication
- Recovery
- Lessons Learned

Key SOC Metrics (KPIs)

- MTTD – Mean Time to Detect
- MTTR – Mean Time to Respond
- False Positive Rate
- Incident Closure Rate

SIEM Key Functions

- Log collection and normalization
- Correlation and alerting
- Dashboards and reporting
- Threat intelligence integration

Common Log Sources

- Firewalls (FortiGate)
- Endpoints (EDR/XDR)
- Servers (Windows/Linux)
- Authentication systems

Fortinet Stack (Exam-Focused)

- FortiGate – Firewall
- FortiAnalyzer – Log analysis & reports
- FortiSIEM – SIEM platform
- FortiClient – Endpoint protection

MITRE ATT&CK;

- Tactics: Initial Access, Execution, Persistence
- Techniques: Brute force, Phishing, Lateral Movement
- Used for detection mapping & threat hunting
