

SOC Scenario-Based Interview Questions & Answers

Scenario 1: You receive multiple failed login alerts from different geolocations. What is your response?

Answer: Validate the alert, check authentication logs, identify affected accounts, block malicious IPs, reset credentials, and document the incident.

Scenario 2: How do you detect lateral movement?

Answer: By analyzing authentication logs, abnormal SMB/RDP traffic, and correlating endpoint and network telemetry.

Scenario 3: An alert is false positive. What next?

Answer: Tune rules, adjust thresholds, whitelist legitimate behavior, and document changes.
