

EC-110 Computing Fundamentals

Experiment # 3, 4

Introduction to Microsoft PowerPoint

1. Objective/s:

- Setting Up Your PowerPoint Environment
- Presentation Basics
- Text Basics
- Themes and background styles
- Pictures and Clip Art
- Working with Lists
- Working with Tables and Charts

1. Setting Up Your PowerPoint

Environment Introduction

Before you begin creating presentations in PowerPoint, you may want to **set up your PowerPoint environment** and become familiar with a few **key tasks** such as how to minimize and maximize the Ribbon, configure the Quick Access toolbar, switch views, and access your PowerPoint options.

The PowerPoint Environment

Exploring the PowerPoint Window

When you open PowerPoint, a new presentation is created and a blank slide appears in the PowerPoint window. The slide has placeholders for you to add a title and subtitle.

The **tabbed Ribbon menu system** is how you access the various PowerPoint commands. If you have used previous versions of PowerPoint, the Ribbon system replaces the traditional menus. Above the Ribbon in the upper-left corner is the **Microsoft Office Button**. From here, you can access important options such as New, Save, Save As, and Print. By default the **Quick Access Toolbar** is pinned next to the Microsoft Office Button, and includes commands such as Undo

and

Redo.

On the left side of the window, you will see a **task pane** with slides and outline tabs, which appear by default. On the bottom, right area of the screen you will find View commands (Normal, Slide Sorter, and Slide Show), and the zoom tool.

To Zoom In and Out:

- Locate the **zoom bar** in the bottom, right corner.
- Click the **slider** and **drag** it to the right to zoom in and to the left to zoom out.

**To Change Views**

- Locate the **View options** in the bottom, right corner. The View options are Normal, Slide Sorter, and Slide Show.
- Click an option to select it.

The default is **Normal View**.

Quick Access Toolbar and Ribbon**The Quick Access Toolbar**

The Save, Undo, and Redo commands appear by default on the Quick Access toolbar. You may wish to add other commands to make using specific PowerPoint features more convenient for you.

To Add Commands to the Quick Access Toolbar:

- Click the **arrow** to the right of the Quick Access toolbar.
- Select the **command** you wish to add from the drop-down list. It will appear in the Quick Access toolbar.

OR

- Select **More Commands** from the menu and a dialog box appears.
- Select the command you wish to add.
- Click the **Add** button.
- Click **OK**.

The Ribbon

The new, **tabbed Ribbon system** replaces traditional menus in PowerPoint 2007. It is designed to be responsive to your current task and easy to use; however, you can choose to **minimize the Ribbon** if you would prefer to use different menus or keyboard shortcuts.

To Minimize and Maximize the Ribbon:

- Click the **drop-down arrow** next to the Quick Access toolbar.
- Select **Minimize Ribbon** from the list. The Ribbon disappears.
- To maximize the ribbon, click the arrow again and select **Minimize the Ribbon** to toggle the feature off.

You can also minimize and maximize the Ribbon by right-clicking anywhere in the Ribbon and selecting **Minimize the Ribbon** in the menu that appears.

The Microsoft Office Button Menu

The Microsoft Office Button

The **Microsoft Office Button** appears at the top of the PowerPoint window. When you click the button, a menu appears. From this menu you can create a new presentation, open existing files, save files in a variety of ways, and print. You can also add security features, send, publish, and close files.

To Change the Default PowerPoint Options:

- Click the **PowerPoint Options** button. A dialog box will appear.
- Select a **category** on the left to access different PowerPoint options.
- Modify any of the default settings. For example, if you want to change the **color scheme** of the PowerPoint window, click the color scheme drop-down menu in the **Popular** section and choose an option. In this example, we choose Black.

- Click OK and the changes will be applied. In this example, the PowerPoint window color scheme is now Black.

As you learn more about PowerPoint and become proficient at using it, you may want to modify some of the settings. As a **beginning user**, it is usually best to **leave** the **default settings**.

2. Presentation

Basics Introduction

PowerPoint includes all the features you need to produce professional-looking presentations. When you create a PowerPoint presentation, it is made up of a series of **slides**. The slides contain the information you want to communicate with your audience. This information can include text, pictures, charts, video, sound, and more.

Before you begin adding information to slides, you need to know the basics of working with slides. In this lesson you will learn how to start a new presentation, **insert** new slides, modify a **layout**, move and copy slides, how **placeholders** work, as well as how to save your presentation.

Creating New Presentations

New Presentations

When you open PowerPoint from the **Start** menu or from an icon on your desktop, a new presentation with **one slide** appears by default. You can also create a new presentation while PowerPoint is **already open**.

- Click the **Microsoft Office Button** and choose **New** from the menu.

The **New Presentation** dialog box will appear. **Blank** presentation is selected by default.

- Click **Create**, and a new presentation will open in the PowerPoint window.

The default slide that appears when you create a new presentation is a **Title Slide** layout.

Slide Basics

About the Slides

Slides contain **placeholders**, or areas on a slide that are enclosed by dotted borders. Placeholders can contain many different items including text, pictures, and charts. Some placeholders have **placeholder text**, or text that you can replace, and **thumbnail-sized icons** that represent specific commands such as Insert Picture, Insert Chart, and Insert Clip Art. Hover over each icon to see the type of information you can insert.

About Slide Layouts

The placeholders are arranged in different **layouts** that you can select when you **insert a new slide** or that can be **applied to existing slides**. In the example above, the layout is called **Title and Content** and includes title and content placeholders.

A slide layout **arranges** your slide content. Layouts contain different types of placeholders that you can use depending on what information you want to include in your presentation. Each layout has a descriptive name, but the image of the layout shows you how the placeholders are arranged on the slide.

To Insert Text into a Placeholder:

- Click inside the **placeholder**. The placeholder text will disappear and the **insertion point** will appear.
- Type your text once the insertion point is visible.

- Click **outside the placeholder** when you have entered all your text into the placeholder. When you enter text or use the icons to insert items, the placeholder text and/or icons disappear as soon as you start typing.

To Insert a New Slide:

- Click the **New Slide** command in the **Slides** group on the Home tab. A menu will appear with your slide layout options.

- Click the slide you want to insert. A new slide with the chosen layout will appear in the center of the PowerPoint window and in the pane on the left.

To Change the Layout of an Existing Slide:

- Select the slide you wish to change.
- Click the **Layout** command in the **Slides** group on the Home tab. A menu appears with your options.

- Click an option to select it. The slide will change in the presentation.

To Copy and Paste a Slide:

- Select the slide you wish to copy.
- Click the **Copy** command on the Home tab.

- Click inside the slides tab on the left task pane. A **horizontal insertion point** will appear.
- Move the insertion point to the location you want the copy of the slide to appear.

- Click the **Paste** command on the Home tab. The copied slide will appear.

You can use the keyboard shortcut **Ctrl** and **C** to copy the slide and **Ctrl** and **V** to paste it.

To Delete a Slide:

- Select the slide you wish to **delete**.
- Click the **Delete** command in the Slides group on the Home tab.

You can also delete a slide by pressing the Delete key on your keyboard.

To Move a Slide:

- Select the slide you wish to **move** on the slides tab in the left task pane.
- Click and drag the slide to a new location. The insertion point will appear.
- Release the mouse button. The slide will appear in the new location.

Using Different Views from the PowerPoint Window

In the bottom, right corner of the PowerPoint window are three **view** commands. From here, you can change the view to Normal, Slide Sorter, or Slide Show view by just clicking a command.

Normal is the **default view** and where you will create and edit your slides in the center slide pane and all the slides will appear on the slides tab in the left task pane.

Slide Sorter is a view of your slides in thumbnail form. The slides are presented horizontally, which allows you to see more slides at a time.

Slide Show view fills the computer screen with your presentation so you can see how the presentation will appear to the audience.

Saving Your Presentation

If you are saving a document for the first time, you will need to use the **Save As** command; however, if you have already saved a presentation, you can use the **Save** command.

To Use the Save As Command:

- Click the **Microsoft Office Button**.
- Select **Save As**. A menu will appear.

- Select the type of file you would like to save the presentation as. The two most commonly used file types are:
 - **PowerPoint Presentation** -- This saves the presentation as a 2007 PowerPoint file. Only users with PowerPoint 2007, or the compatibility pack, can view the file without possibly losing some of the formatting.
 - **PowerPoint 97-2003 Presentation** -- This saves the presentation so that it is compatible with some previous versions of PowerPoint. If you will be sending the presentation to someone that does not have Office 2007, you should use this file type.

- The Save As dialog box will appear. Select the **location** you wish to save the document using the drop-down menu.

- Enter a **name** for the document.
- Click the **Save** button.

To Use the Save Command:

- Click the **Microsoft Office Button**.
- Select **Save** from the menu.

Using the Save command saves the document in its current location using the same file name.

3. Text Basics

Introduction

It is important to know how to perform **basic tasks with text** when working in PowerPoint. In this lesson you will learn the basics of working with text including how to insert, delete, select, and move text, as well as how to work with text boxes.

Text Basics

In PowerPoint, you can insert text into placeholders or text boxes. Text in both can be formatted using the same commands.

To Insert Text:

- Click the **placeholder** or **text box** where you wish to insert text. The **insertion point** will appear. If you are working with a placeholder, placeholder text will disappear.
- Type the text you wish to appear.

To Delete Text:

- Place your cursor next to the text you wish to delete.
- Press the **Backspace** key on your keyboard to delete text to the left of the cursor.
- Press the **Delete** key on your keyboard to delete text to the right of the cursor.

To Select Text:

- Place the **insertion point** next to the text you wish to select.
- Click and drag your mouse over the text to select it.
- Release the mouse button. You have selected the text. A **highlighted box** will appear over the selected text.

When you select text or images in PowerPoint, a **hover toolbar** with formatting options appears.

This makes formatting commands easily accessible, which may save you time.

To Format Font Size:

- Select the text you wish to modify.
- Click the **drop-down arrow** next to the **font size box** on the Home tab. The font size drop-down menu appears.
- Move your cursor over the various font sizes. A **live preview** of the font size will appear in the document.

- Click the font size you wish to use. The font size will change in the document.

To Format Font Style:

- Select the text you wish to modify.
- Click the **drop-down arrow** next to the **font style box** on the Home tab. The font style drop-down menu appears.
- Move your cursor over the various font styles. A **live preview** of the font will appear in the document.

- Click the font style you wish to use. The font style will change in the document.

To Format Font Color:

- Select the text you wish to modify.

- Click the drop-down arrow next to the **font color box** on the Home tab. The font color menu appears.
- Move your cursor over the various font colors. A live preview of the color will appear in the document.

- Click the font color you wish to use. The font color will change in the slide.

Your color choices aren't limited to the drop-down menu that appears. Select **More Colors** at the bottom of the list to access more color choices.

To Use the Bold, Italic, and Underline Commands:

- Select the text you wish to modify.
- Click the Bold, Italic, or Underline command in the **Font group** on the Home tab.

Click the command again to remove the formatting.

Other Font Commands

Increase Font Size command increases the font size of the selected text to the next standard font size.

Decrease Font Size command decreases the font size of the selected text to the next standard font size.

Clear All Formatting command removes your recent formatting changes.

Strikethrough command makes a line through the text.

Text Shadow command adds a drop shadow to text.

Change Case commands lets you try different capitalization options without having to delete and retype letters or words.

To Change Text Alignment:

- Select the text you wish to modify.
- Select one of the four **alignment options** from the Paragraph group on the Home tab.
 - **Align Text Left:** Aligns all the selected text to the left margin.
 - **Center:** Aligns text an equal distance from the left and right margins.
 - **Align Text Right:** Aligns all the selected text to the right margin.

- **Justify:** Justified text is equal on both sides and lines up equally to the right and left margins.

The alignment commands align the text within the placeholder or text box it is in, not across the slide.

Text boxes

In addition to inserting text in placeholders, you can also insert text into text boxes. Text boxes allow you to add to the predefined layouts so that you can place text wherever you want on a slide.

To Insert a Text box:

- Select the **Insert** tab on the Ribbon.
- Click the **Text Box** command in the **Text** group.
- Click and drag the cursor until the text box is the desired width.

- Release the mouse button.

To Move a Text Box:

- Click the text box. Your cursor becomes a **cross with arrows** on each end.
- While holding the mouse button, **drag** the text box to the desired location on the page.

- Release the mouse button.

To Resize a Text Box:

- Select the text box.
- Click one of the **square sizing handles** on the left or right sides, or a circular handle on one of the four corners.
- While holding down the mouse button, **drag the sizing handle** until the text box is the desired width.

Click and drag the green circle to rotate the text box.

Moving Text

To Copy and Paste Text:

- Select the text you wish to copy.
- Click the **Copy** command on the Home tab.
- Place your insertion point where you wish the text to appear.
- Click the **Paste** command on the Home tab. The text will appear.

To Cut and Paste Text:

- Select the text you wish to cut.
- Click the **Cut** command on the Home tab.
- Place your insertion point where you wish the text to appear.
- Click the **Paste** command on the Home tab. The text will appear.

To Drag and Drop Text:

- Select the text you wish to copy.
- Click your mouse and **drag the text** to the location you wish it to appear. The cursor will have a text box beneath it to indicate that you are moving text.
- Release the mouse button and the text will appear.

4. Themes and Background Styles

About Themes

When you create a **new presentation** in PowerPoint there is a theme applied even though the slide background is white. This default theme is called the **Office Theme**. The Office Theme consists of a white background, and Calibri font of various sizes for titles and body text.

You can apply a **different theme** to your slides **before** you add text or make changes to the default slide. An advantage of doing this is that the location of the text will not move. If you apply the theme after you enter text on the slides, the text boxes and placeholders may move

depending on the theme you choose.

An advantage of entering some of your text before applying a new theme is that the **live preview** feature allows you to see how the themes will affect your specific text. The example below is the Aspect theme.

You will need to know how to apply a theme and how to switch to a different theme if you want to use this feature to create presentations. All of the themes that come included in PowerPoint are located in the Themes group on the Design tab.

To Apply a Theme:

- Select the **Design** tab.
- Locate the **Themes** group. Each image represents a theme.

- Click the drop-down arrow to access more themes.
- Hover over a theme to see a **live preview** of it in the presentation. The name of the theme will appear as you hover over it.

- Click a theme to apply it to the slides.

You can access **additional themes** on Microsoft Office Online or create your own.

Fonts that are changed with the font size and style menus **will not** change when you apply a new theme.

Modify Themes

You can also **modify** the current theme **colors, fonts, and effects**. For example, if you like the **Urban** theme, but would prefer to use more of the color red in the presentation, you can change the colors of the theme and create a new, **custom theme**. If you would prefer to use the font style Verdana so that your presentation font will match your company logo and materials, you can modify the font combination and save it.

The PowerPoint themes are powerful because they allow you to create professional-looking slides easily. The option to modify these themes makes it an even more robust and powerful tool because you can customize the themes based on your needs and preferences.

To Switch to a Different Theme Color Option:

- Select the **Colors** command in the **Themes** group on the Design tab.

- Hover over a **color group** to display a **live preview** of the color combination on the selected slide.

- Click a color option to select it.

To Change the Current Theme Colors:

- Select the **Colors** command in the **Themes** group on the Design tab.
- Click **Create New Theme Colors** from the menu. A dialog box will appear.

- Click a **color option** to display a color menu. Choose a color to change the option.

- Enter a **name** for the new theme color combination.
- Click **Save**.

Modify Themes (cont.)

To Switch to a Different Theme Font Option :

- Select the **Fonts** command in the **Themes** group on the **Design** tab.

- Hover over a font group to display a **live preview** of the font combination on the selected slide.

- Click a font option to select it.

To Change the Current Theme Fonts:

- Select the **Fonts** command in the **Themes** group on the Design tab.
- Click **Create New Theme Fonts**. A dialog box will appear.

- Select new fonts using the drop-down menus.

- Enter a **name** for the new theme font combination.
- Click Save.

To Switch to a Different Theme Effects Option:

- Select the **Effects** command in the **Themes** group on the Design tab. A menu will appear.

- Select an effect option from the menu.

Background Styles

Background styles can be added to your slides after a theme is applied. The styles are fill variations based on theme colors. When you **switch to a different theme**, the background styles are updated based on the new theme colors. The background style options for the Urban theme are different than the background style options for the Apex theme. The colors are different based on the theme colors.

To Apply a Background Style:

- Click the **Background Styles** command in the **Background** group on the Design tab.

- Click a style to select it. The new background will appear in the slides.

You can select Format Background from the menu to open a dialog box and make changes to the background color.

5. Working with Lists Introduction

Bulleted and numbered lists can be used in your presentation to **arrange and format text** on slides to draw emphasis to specific information. Also, lists can often be **easier** for the audience **to read** than paragraphs of text on a slide. In this lesson, you will learn how to modify existing bullets, change bullet style, switch to a numbered list, remove bullets and numbers, and select symbols as bullets.

Working with Lists

Some **slide layouts** include a **content placeholder** where you can **add text**, or use graphical commands to insert tables, charts, SmartArt graphics, pictures, clip art, and media clips. On these slides, a bullet appears to the left of the placeholder text. If you choose to add text, rather than using one of the graphical commands to insert an item, the text is formatted into a **list** by default.

To Insert Text as a List in a Content Placeholder:

- Select the **placeholder**. The placeholder text will disappear and the insertion point will appear to the right of the bullet.
- Enter **text**. If the text requires more than one line, it will automatically wrap to the following line.
- Press the **Enter** key. A new bullet will appear on the following row.
- Repeat the last two steps until all the information is entered in list format on the slide.

Team Exercise

- Break into five teams of to.
- Blindfold a teammate.
- Lead the blindfolded teammates across a log using only your voice to give directions.

The default bullet style and color is determined by the theme. The Urban theme has a different default bullet than the Apex theme.

Bulleted Lists

To Select an Alternate Bullet Style or Switch to a Bulleted List:

- Select all the text in an existing list (if text has been entered).
- Click the drop-down arrow next to the **Bullets** command in the Paragraph group on the Home tab. A menu of bullet options will appear.

Exercise

- Break into five teams of to.
- Blindfold a teammate.
- Lead the blindfolded

- Hover over each menu option to display a live preview of the bullet on the slide.

- Click a **bullet option** to select it. The bullet will change on the slide.

To Change the Bullet Color:

- Select an existing bulleted list (if text has been entered).
- Click the drop-down arrow next to the **Bullets** command on the Home tab. A menu will appear.
- Select **Bullets and Numbering** from the menu. A dialog box will appear.

- Click the **Color** menu on the Bulleted tab.

- Select a color. The bullet options in the menu will change color.
- Click **OK** to apply the bullet color to the list in the slide.

To Change the Bullet Size:

- Select an existing bulleted list (if text has been entered).

- Click the drop-down arrow next to the **Bullets** command on the Home tab. A menu will appear.
- Select **Bullets and Numbering** from the menu. A dialog box will appear.
- Set the bullet size using the **Size** field on the Bulleted tab.

- Click **OK** to apply the bullet size to the list in the slide.

To Use a Picture as a Bullet:

- Select an existing bulleted list (if text has been entered).
- Click the drop-down arrow next to the **Bullets** command on the Home tab. A menu will appear.

- Select **Bullets and Numbering** from the menu. A dialog box will appear.
- Click **Picture** on the Bulleted tab. The Picture Bullet dialog box will open.

- Click a picture to select it.

- Click **OK** to apply the picture to the list in the slide.
- Click Import to import your own picture and use it as a bullet.

To Use a Symbol as a Bullet:

- Select an existing bulleted list (if text has been entered).
- Click the drop-down arrow next to the **Bullets** command on the Home tab. A menu will appear.
- Select **Bullets and Numbering** from the menu. A dialog box will appear.
- Click **Customize** on the Bulleted tab. The Symbol dialog box will appear.
- Click the **Font:** drop-down menu and select a font category.

- Click a **symbol** to select it.
- Click OK. The symbol will now appear as the selected bullet option in the Bulleted section of the Bullets and Numbering dialog box.
- Click OK to apply the symbol to the list in the document.

Numbered Lists

To Select an Alternate Numbering Style or Switch to a Numbered List:

- Select all the text in an existing list (if text has been entered).

- Click the drop-down arrow next to the **Numbering** command in the Paragraph group on the Home tab. A menu of numbering options will appear.

- Hover over each **menu option** to display a live preview of the list on the slide.

- Click a numbering option to select it. The list will change on the slide.

To Change the Number Color:

- Select an existing numbered list (if text has been entered).
- Click the drop-down arrow next to the **Numbering** command on the Home tab. A menu will appear.
- Select **Bullets and Numbering** from the menu. A dialog box will appear.

- Click the **Color** menu on the Numbered tab.

- Select a color. The number options in the menu will change color.
- Click OK to apply the number color to the list in the slide.

Numbered Lists (cont.)

To Change the Number Size:

- Select an existing numbered list (if text has been entered).
- Click the drop-down arrow next to the **Numbering** command on the Home tab. A menu will appear.
- Select **Bullets and Numbering** from the menu. A dialog box will appear.
- Set the bullet size using the **Size** field on the Numbered tab.

- Click OK to apply the number size to the list in the slide.

To Set the Number to Begin the List:

- Select an existing numbered list (if text has been entered).
- Click the drop-down arrow next to the **Numbering** command on the Home tab. A menu will appear.
- Select **Bullets and Numbering** from the menu. A dialog box will appear.
- Enter the **number** to start the list in the **Start at:** field on the Numbered tab.

- Click OK to apply to the list on the slide.

To Remove Bulleted or Numbered Lists from Text:

- **Select** an existing bulleted or numbered **list**.
- Click the **Bullets** command or the **Numbering** command, depending on the type of list. Click these commands to **toggle** the feature **on** and **off**.

EXERCISES

1. Open Power Point and Prepare Slides as guided in laboratory, apply all the given instruction on your powerpoint slides:
 - a) Open PowerPoint.
 - b) Practice using the Zoom tool.
 - c) Minimize and maximize the Ribbon.
 - d) Click the Microsoft Office Button and review the menu options.
 - e) Add two commands to the Quick Access toolbar.
 - f) Continue to explore the PowerPoint environment
 - g) Insert text on the default, Title slide.
 - h) Insert a Title and Content slide.
 - i) Insert a Two Content slide.
 - j) Practice moving slides.
 - k) Copy the Title slide.
 - l) Delete one of the slides.
 - m) Save the presentation.
 - n) Insert text on a slide.
 - o) Practice using the bold, italic, and underline commands.
 - p) Change the font style of the title.
 - q) Change the font size of the title.
 - r) Change the color of the subtitle.
 - s) Use the Change Case command on a slide title.
 - t) Practice using the Increase Font Size and Decrease Font Size commands.
 - u) Apply the Urban theme to your slides.
 - v) Change at least one of the theme color options.
 - w) Change to a new theme font.

Note: Print the slides and submit them as your lab report.
