

HITEC University, Taxila

Department of Computer Engineering

BS Computer Engineering Program

Course Title:	EC-467 Mobile Application Development 3 (2+1)
Batch / Semester:	Batch 2021 / 6 th Semester
Instructor:	Dr. Muhammad Bilal
Target CLO:	CLO:4. [P2]: Perform experiments in laboratory using mobile application development environment.
Instruction:	Use of internet is not allowed, only previous lab task and their code can be used in OEL.

Open Ended Lab

Design a simple notepad for android operating system using android studio and **write** a java code to **perform** the following.

1. The home screen should allow the user to create a new note and open the new note and shown in figure 1.
2. In new note screen there is option has option to save the note as shown in figure 2.
3. Once the user save the note, return back to home screen and home screen should display the list of created notes.
4. The user can able to click on the item in the created list to view/edit the old notes.

Note: Bonus point for those who include date and time the note created and display the date and time on the list item of the note.
