

The background is a dark blue gradient with faint, stylized technical drawings. These include several circular gauges or dials with concentric circles and radial lines. Some gauges have numerical markings around their perimeters, such as 150, 160, 170, 180, 190, 200, 210, 220, 230, 240, 250, and 260. Arrows of various sizes and orientations are scattered throughout the design, suggesting a sense of motion or measurement. The overall aesthetic is technical and modern.

TECHNICAL REPORT WRITING

BUSINESS COMMUNICATION

TAUQEER ANJUM

LC: WAQAR ISMAIL

BUSINESS COMMUNICATION

- **Inside communication**
 1. memorandums
 2. Meeting documents
 3. Proposals
- **Outside communication**
 1. Letters

YOU WILL LEARN

- Plan
- Design
- Compose

INSIDE COMMUNICATION

- **1. Memorandums**

Memos

- **2. Meeting document's**

- 2.1 Minutes of the meeting
- 2.2 Agenda of the meeting

- **3. Proposals**

For business and technical writing

1.MEMORANDUMS

- Memoranda are brief Informal reports, use to established a record.
- They generalize the communication process by transmitting the message from one or more authors to one or more recipients
- (1 to one or one to many or many to one or many t many)

MEMORANDUMS

- Email messages typically take the form of memoranda.
(email is easy , fast and authentic)
- It is the most versatile form of documents among organizations.
- (various varieties for different type of uses and user adopt formats according to need)

EXAMPLES OF MEMO

- A memo could be:

- A brief research report

- A progress report

- Brief proposals

- Technical and administrative information

- Orders
 - Instructions
 - Technical talk

- (in companies there is a lot of administrative information's going back and forth between peoples and most common form of communication is memo)

PURPOSES OF MEMORANDUM

- Memoranda are written for numerous internal purposes
- For example
 - ❖ To require information
 - ❖ To make announcements
 - ❖ To outline policies
 - ❖ To transmit meeting minutes

USE OF MEMORANDUM

- Thus in most organizations, memos play a crucial role in establishing a record of
 - ◆ **Decisions**
 - ◆ **Requests**
 - ◆ **Responsibilities**
 - ◆ **Results**
 - ◆ **Concepts**

PARTS OF MEMOS

- The organization of memos are set up as

□ 1st part

- **Heading**
- (its design, its contents, its title)

1ST PART OF MEMO (HEADING)

- ☐ Declares the Sender address
- ☐ Receiver address
- ☐ Title of memo
- ☐ Date

EXAMPLE OF HEADING OF MEMO

MEMORANDUM

To J.C. Crewe, NIH Small Instrumentation Program

From: D. Mars
Department of Mechanical Engineering
Room 3-250, MIT
Ext. 617-996-2828

Subject: Request for an Image Digitizing System to Support
Ongoing Research (\$10,900)

Date:

Identify the recipient clearly. Use title, if he or she uses it. Recipients may also be addressed as a group.

Identify the author, and add title if the memo is going to another group outside the normal working locale.

Give a clear, detailed identification of the subject under discussion.

2ND PART OF MEMO(MAIN BODY)

- ❑ (putting main idea first)
 - Subject (statement of the purpose)
 - **Summary (short description or a introductory paragraph)**
 - Topic headings(depend on length of memo)
 - Background(may b long or short, divided in many sections)
 - **Problem and highlighted issue**
 - **And how this problem can be solved**
- ❑ 1st topic and then its details and then second idea and its details
 - **Important things come first**
 - **Key points should come first**
- ❑ Start from a statement of purpose or scope of the information's of a summary that declares the scope or limitations of the memoranda.

EXAMPLE OF BODY IN MEMO

MEMORANDUM

TO: J.C. Crewe, NIH Small Instrumentation Program

FROM: D. Mars
Department of Mechanical Engineering
Room 3-250, MIT
Ext. 617-996-2828

DATE: January 16, 1992

SUBJECT: Request for an Image Digitizing System to Support
Ongoing Research (\$10,900)

This request for \$10,000 is for a picture digitizing system and plug-in board for a PC clone, and for an Ethernet board and software. The systems directly serve two NIH grants and indirectly serve other users in the XYZ community through the ability to transfer these images over the campus network. Granting this request will enable their projects to achieve a solid technological base for image analysis.

Problem

Our research has become increasingly dependent upon image analysis to extract quantitative data from pictures taken through microscopes. This requirement has been the focus of a substantial effort over the past six years to develop algorithms for analyzing

THINGS TO REMEMBER

- ✓ If any information that is not easily accessible form text Then we use visual aids Like graphs, Pictures ,Flow diagrams etc.
- ✓ Paragraph line spacing should be inline
- ✓ Lines have single space
- ✓ Paragraph has double space
- ✓ If memo is long and on two pages then there will be a header on second page.(name of the sender and page no and date)
- ✓ A memo is different from a letter
- ✓ In letter you write your sincerely and signed, but in memo there is no signatures

2. MEETING DOCUMENTS

- 2.1 Meeting Agendas
- 2.2 Meetings Minutes
- So meetings will effective
- Without agendas no meeting will successive
- Two principles for any meeting:
 - What is to be discussed in meeting
 - What actually acquired

2.1 METING AGENDA

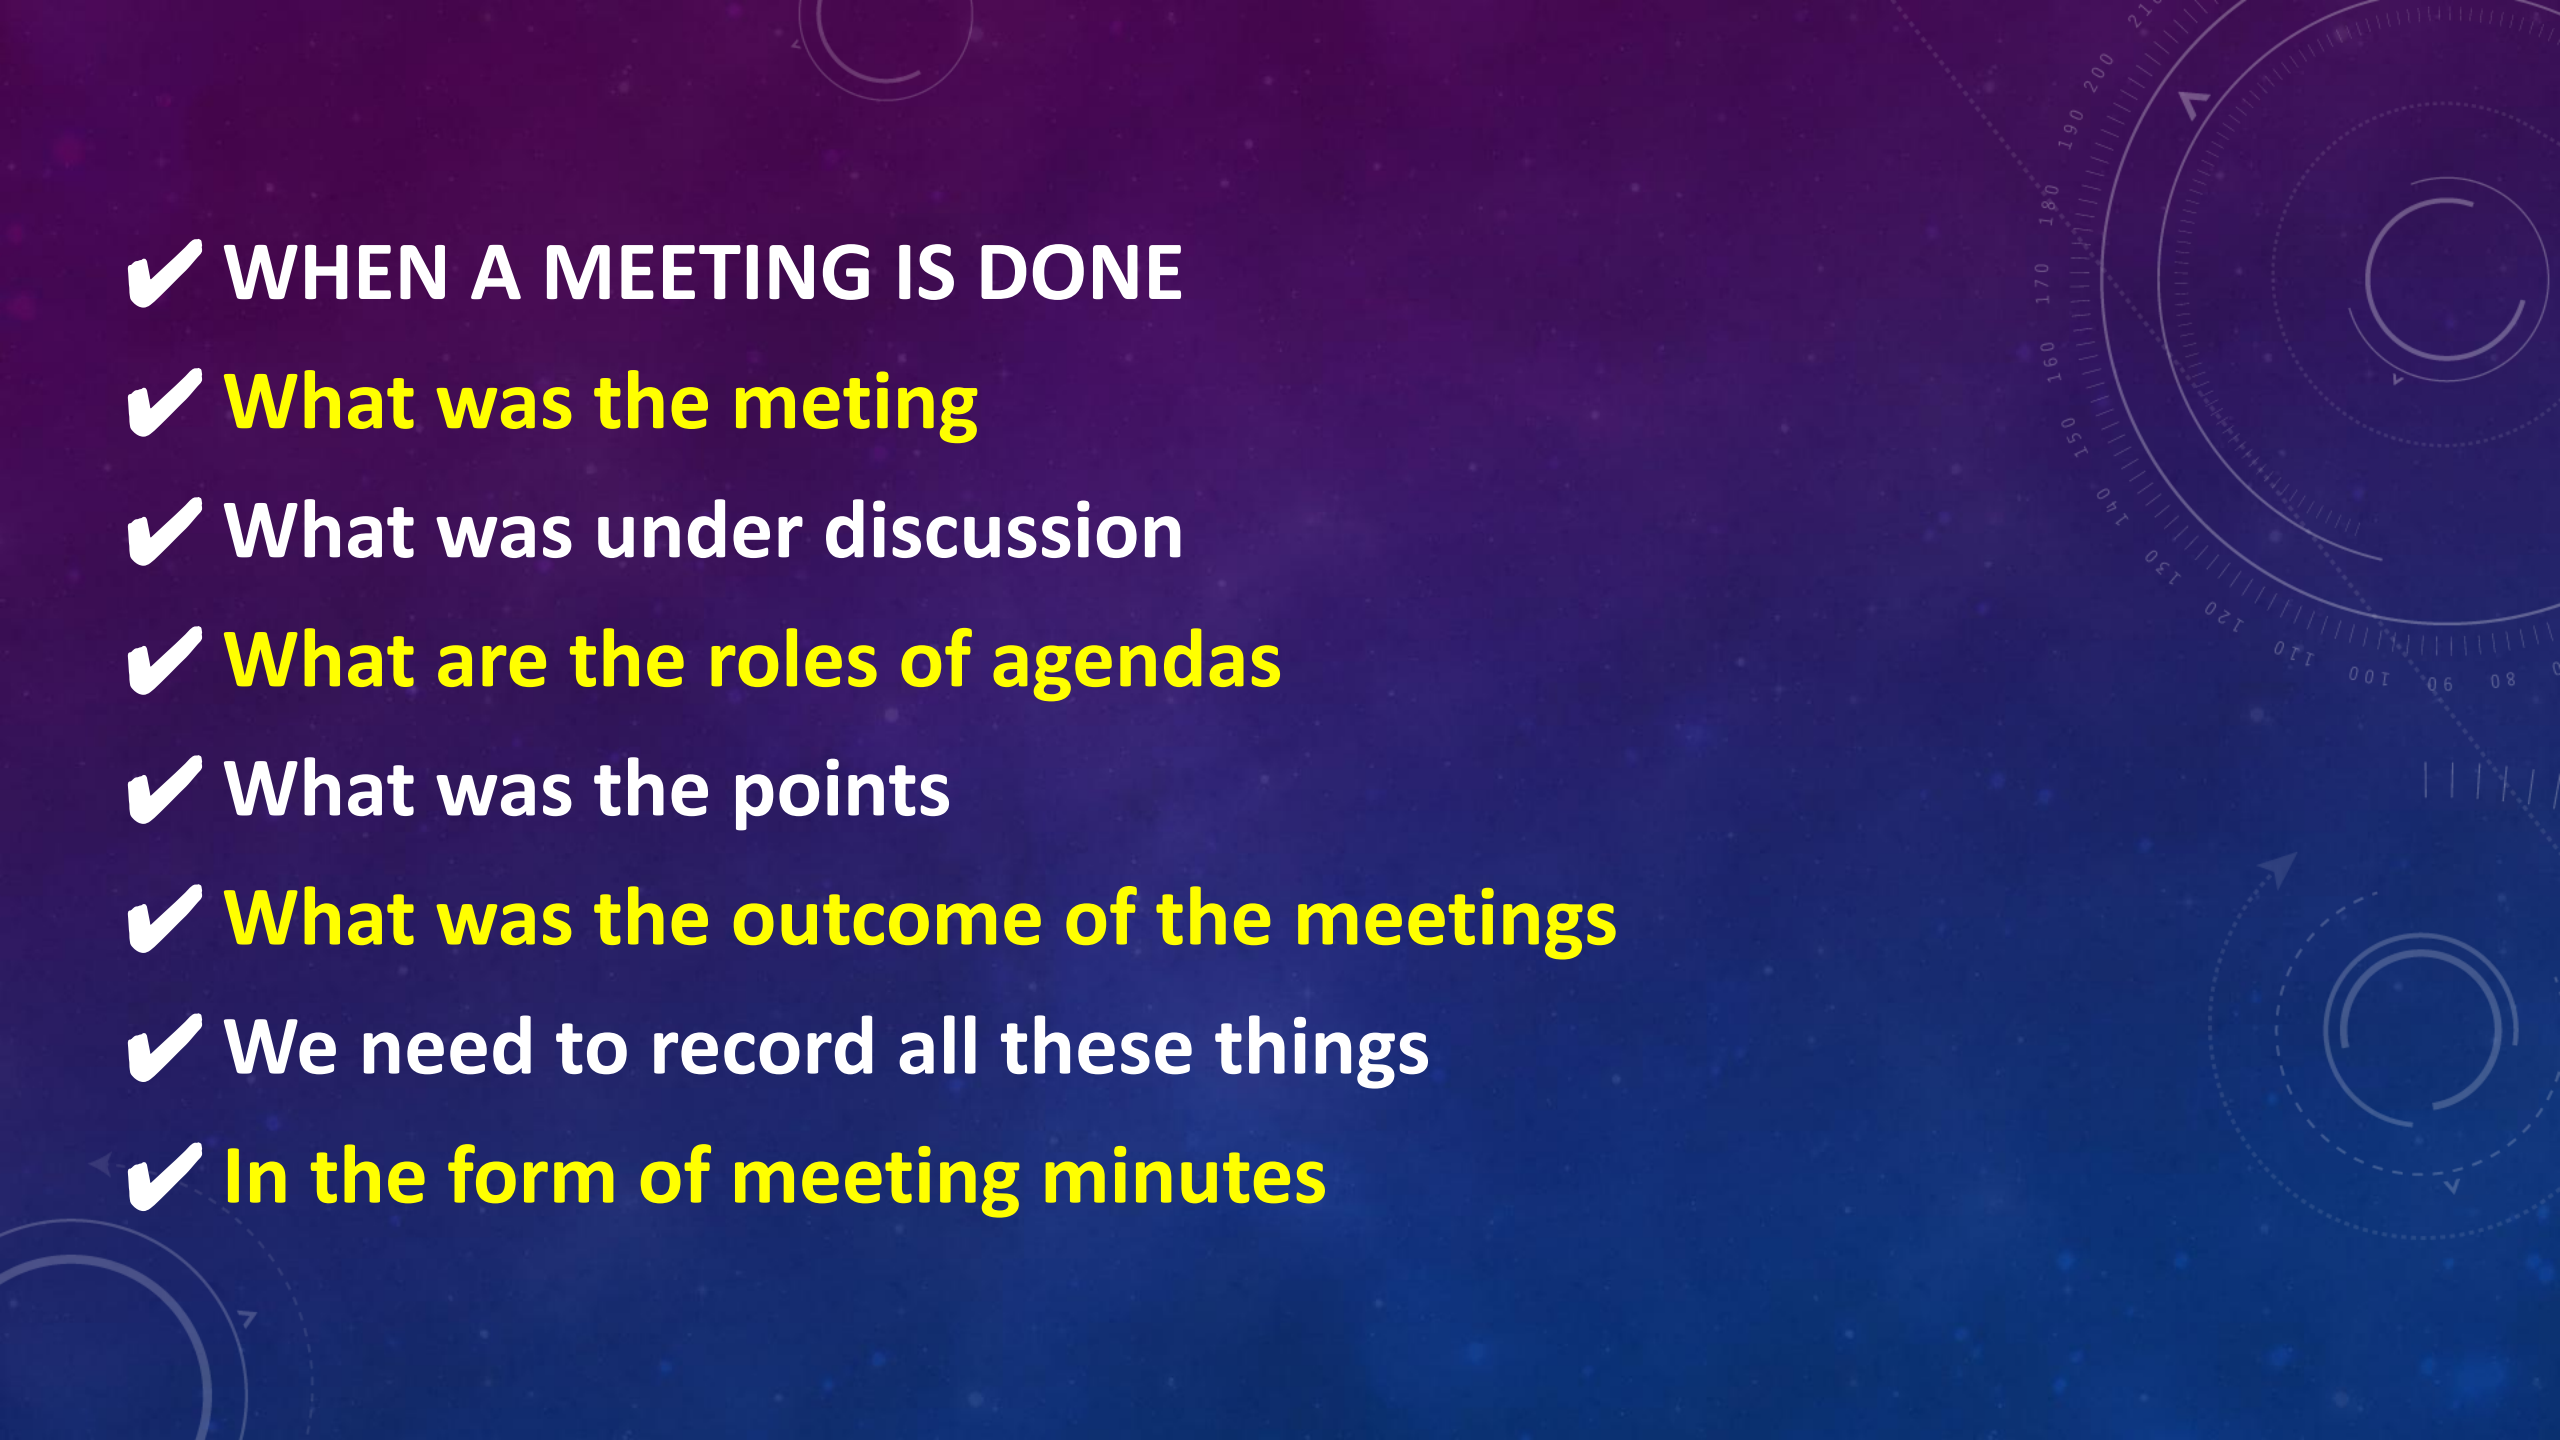

- ❑ An agenda is a simple list of topics to be discussed along with the names of individuals who have agreed to lead discussion of those topics.(names, time, topics
- ❑ A agenda helps focus a meeting on a core of topics and allows you to control the pace and flow of a meeting and identify important items to be accepted upon. (focuses on main points)
- ❑ Meeting without published agendas generally seen unfocused and unproductive.(not in mind but written)

THINGS TO BE REMEMBER

- ✓ Prepare and circulate an aged of items to be discussed for each meeting
- ✓ Circulation of an agenda before meting will allow you audience to consider their response to item listed and will help simulate discussion
- ✓ (they will prepared in their minds that what will be their contributions)
- ✓ Then meting will be more productive
- ✓ Otherwise employee will be silent
- ✓ Agenda may be circulated in hard copies or by e mail
- ✓ Hard coy has more plus points so they can bring
- ✓ Email copy is authentic and on time
- ✓ Both are important (experienced leaders bring copies of agenda)

AGENDA EXAMPLE

- Development team agenda
- Report by MR. Hamid on investigation of possible security software
- Report by miss Sara on development of database prototyping
- Discussion of possible hardware platform
- Review of deadlines for project
- Agenda for next meeting

✓ WHEN A MEETING IS DONE

✓ What was the meeting

✓ What was under discussion

✓ What are the roles of agendas

✓ What were the points

✓ What was the outcome of the meetings

✓ We need to record all these things

✓ In the form of meeting minutes

2.2 METING MINUTES

- ❑ Keeping records of the meeting
- ❑ Whether the meting is between two people or in a group of peoples , minutes have to be recorded.
- ❑ The minutes maintain a institutional memory for all actions taken or suggested actions or keypoints.
- ❑ Absent concerned peopled will be informed through meeting

TYPES OF MINUTES

- Formal minutes
 - Organized, disciplined, follow set of rules, guidelines, formats
 - Decision are made on basis on previous minutes
 - Previous minutes are distributed
 - names,
 - time,
 - attendance,
 - summaries of reports,
 - previous actions,
 - voting of members for a decision,
 - time of formally ending of meeting)
 - Documents are distributes(only concerned persons)
- Informal minutes(to the point only)

EXAMPLE OF A MEETING MINUTES (FORMAL)

[Company/Department Name]

Meeting Minutes

[Click to select date]

Call to order

[Facilitator Name] called to order the regular meeting of the [Organization/Committee Name] at [time] on [click to select date] at [location].

Roll call

[Secretary Name] conducted a roll call. The following persons were present: [attendee names]

Approval of minutes from last meeting

[Secretary Name] read the minutes from the last meeting. The minutes were approved as read.

Open issues

[Open issue/summary of discussion]

[Open issue/summary of discussion]

[Open issue/summary of discussion]

New business

a) [New business/summary of discussion]

b) [New business/summary of discussion]

c) [New business/summary of discussion]

Adjournment

[Facilitator Name] adjourned the meeting at [time].

Minutes submitted by: [Name]

Minutes approved by: [Name]

3. PROPOSALS

- In a proposal , identify a specific problem and state how you will solve that problem
- Most organizations relay on successful proposal writing for their continued existence.
- You will most likely spend a major part of your professional life writing proposals.

THINGS TO REMEMBER

- Proposals are carefully prepared and just as carefully reviewed by granting agencies.
- Proposals do not succeed on the strength of a name or as result of company
 - (not blunders)
- Rather successful proposals demonstrate that you understand the scope of the problem
- (like background, theory and application) and furthermore that you have developed a valid and well focused approach for reaching proposed objectives.

PROPOSALS TYPES

☐ External

- Request from anyone
- Bid on tender

☐ Internal

- Response on a need

PROPOSALS STRUCTURES

- Proposals structure is a general structure architecture which is usually modified to suit specific circumstances.
- A general proposal have some problem background and proposed method.

PROPOSALS STRUCTURES

- The overall structure of a proposal can be broken down into three parts:

- **Front matter**

- **Body**

- Introduction
- Technical approach
- Management requirements
- Work plan

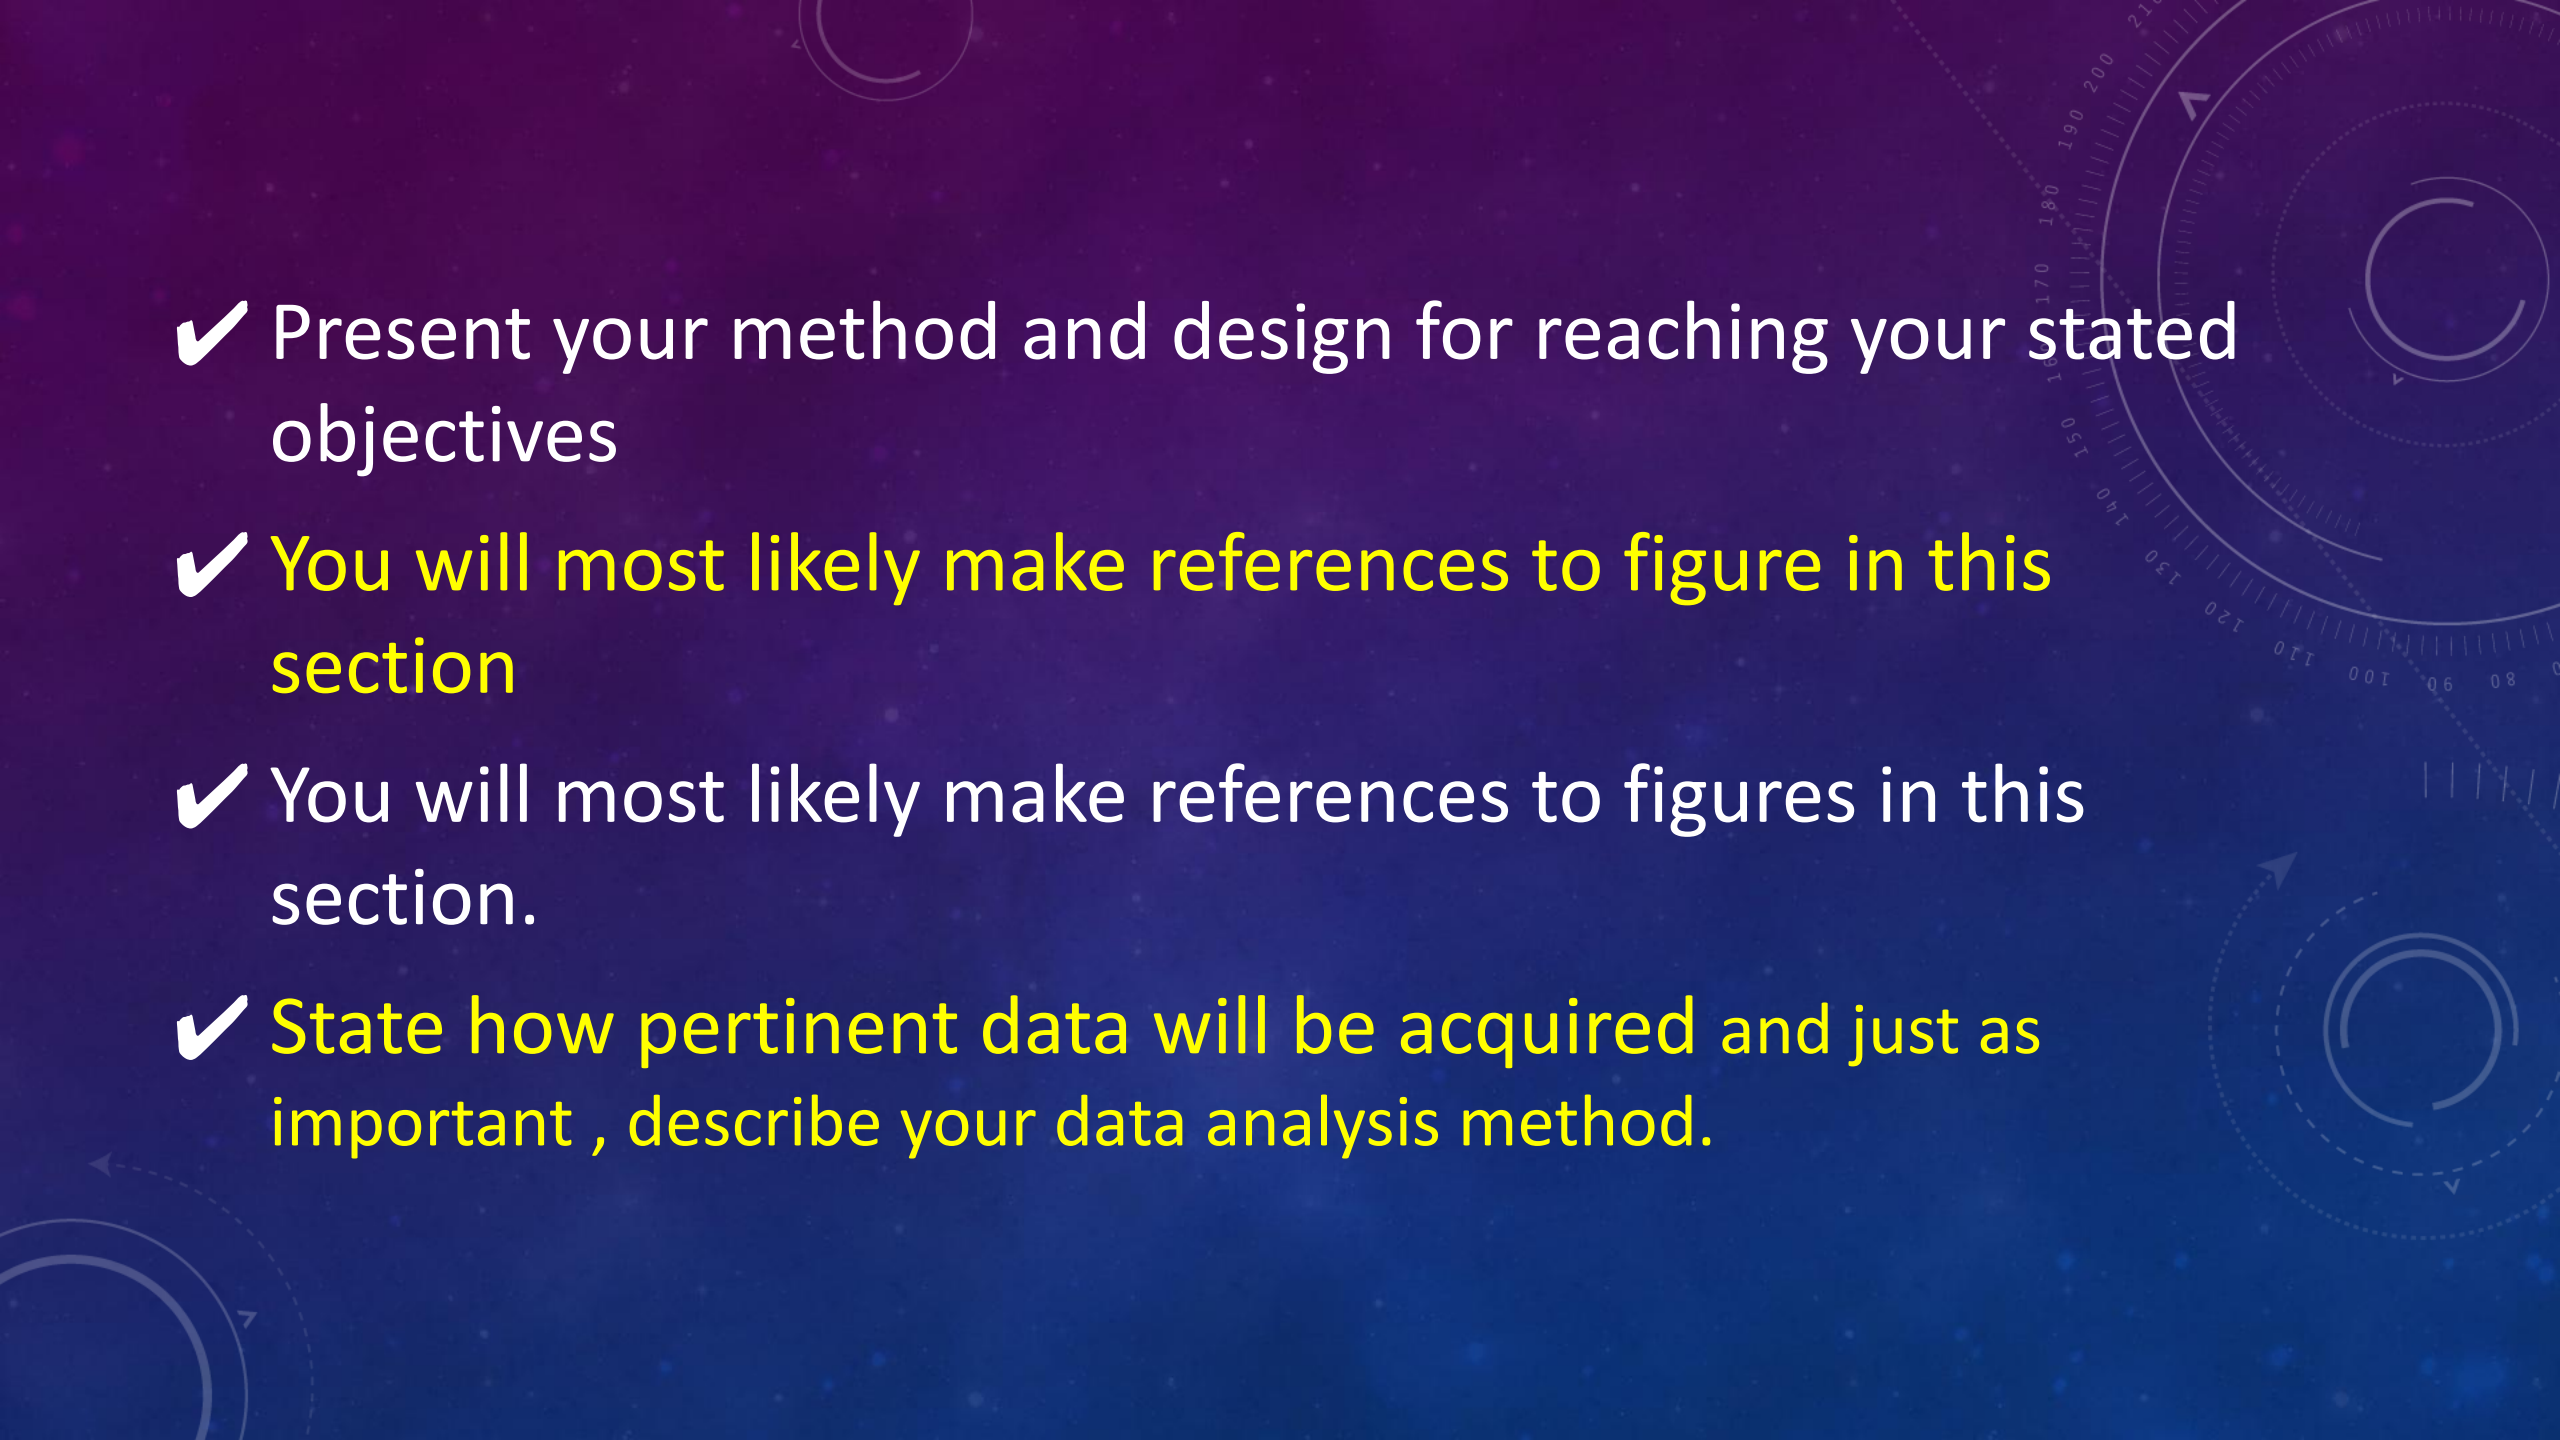

- **End matter**

FRONT MATTER

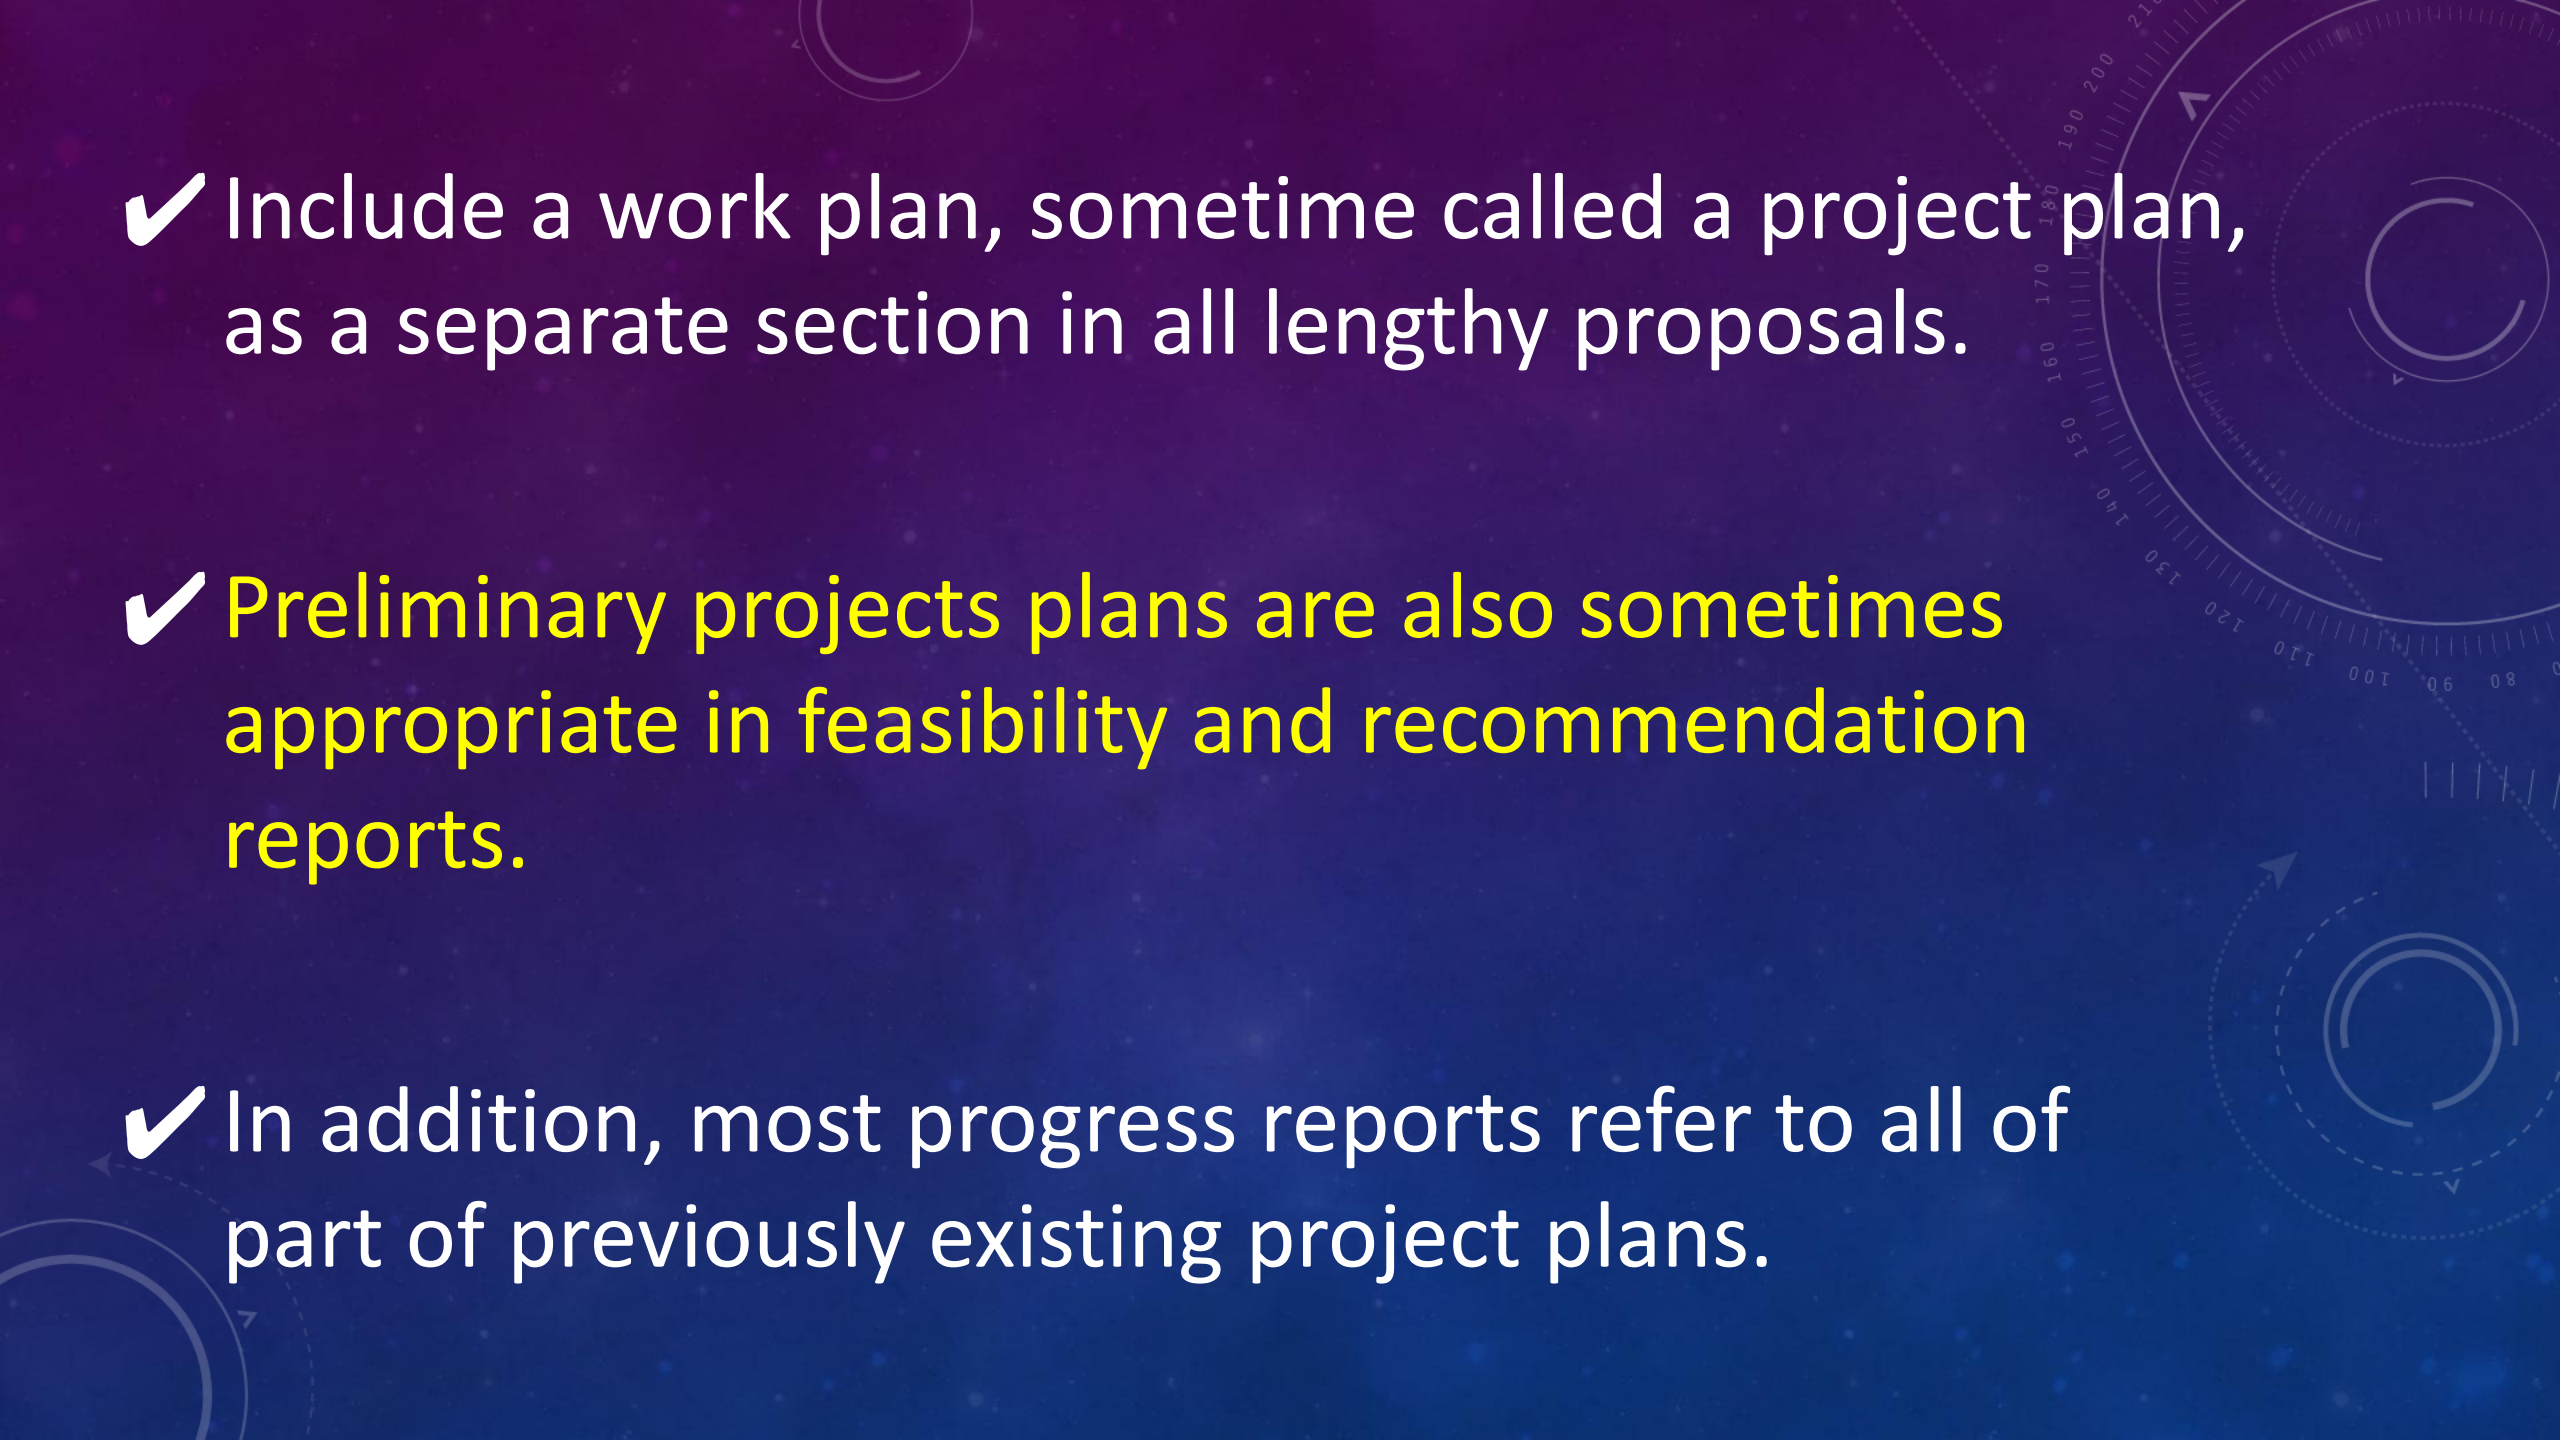

- The front matter of a proposal includes the following components:
 - Letter of transmittal
 - Title page
 - Summary
 - Table of contents
 - List of figures and tables

BODY

- In the introduction of a proposal, do the following :
 - Identify the motivating need or problem
 - Developed a immediate context in which this problem has been highlighted
 - In external proposals be sure you are responding to the published need and motivation as identified by the outside agency
- Focus your proposal by stating the key technical issues as you perceive them underline the motivational problems.
- State explicitly, and with unbiased languages, your objectives. (technical info, feasibility, machinery)

- 
- ✓ Present your method and design for reaching your stated objectives
 - ✓ You will most likely make references to figure in this section
 - ✓ You will most likely make references to figures in this section.
 - ✓ State how pertinent data will be acquired and just as important , describe your data analysis method.

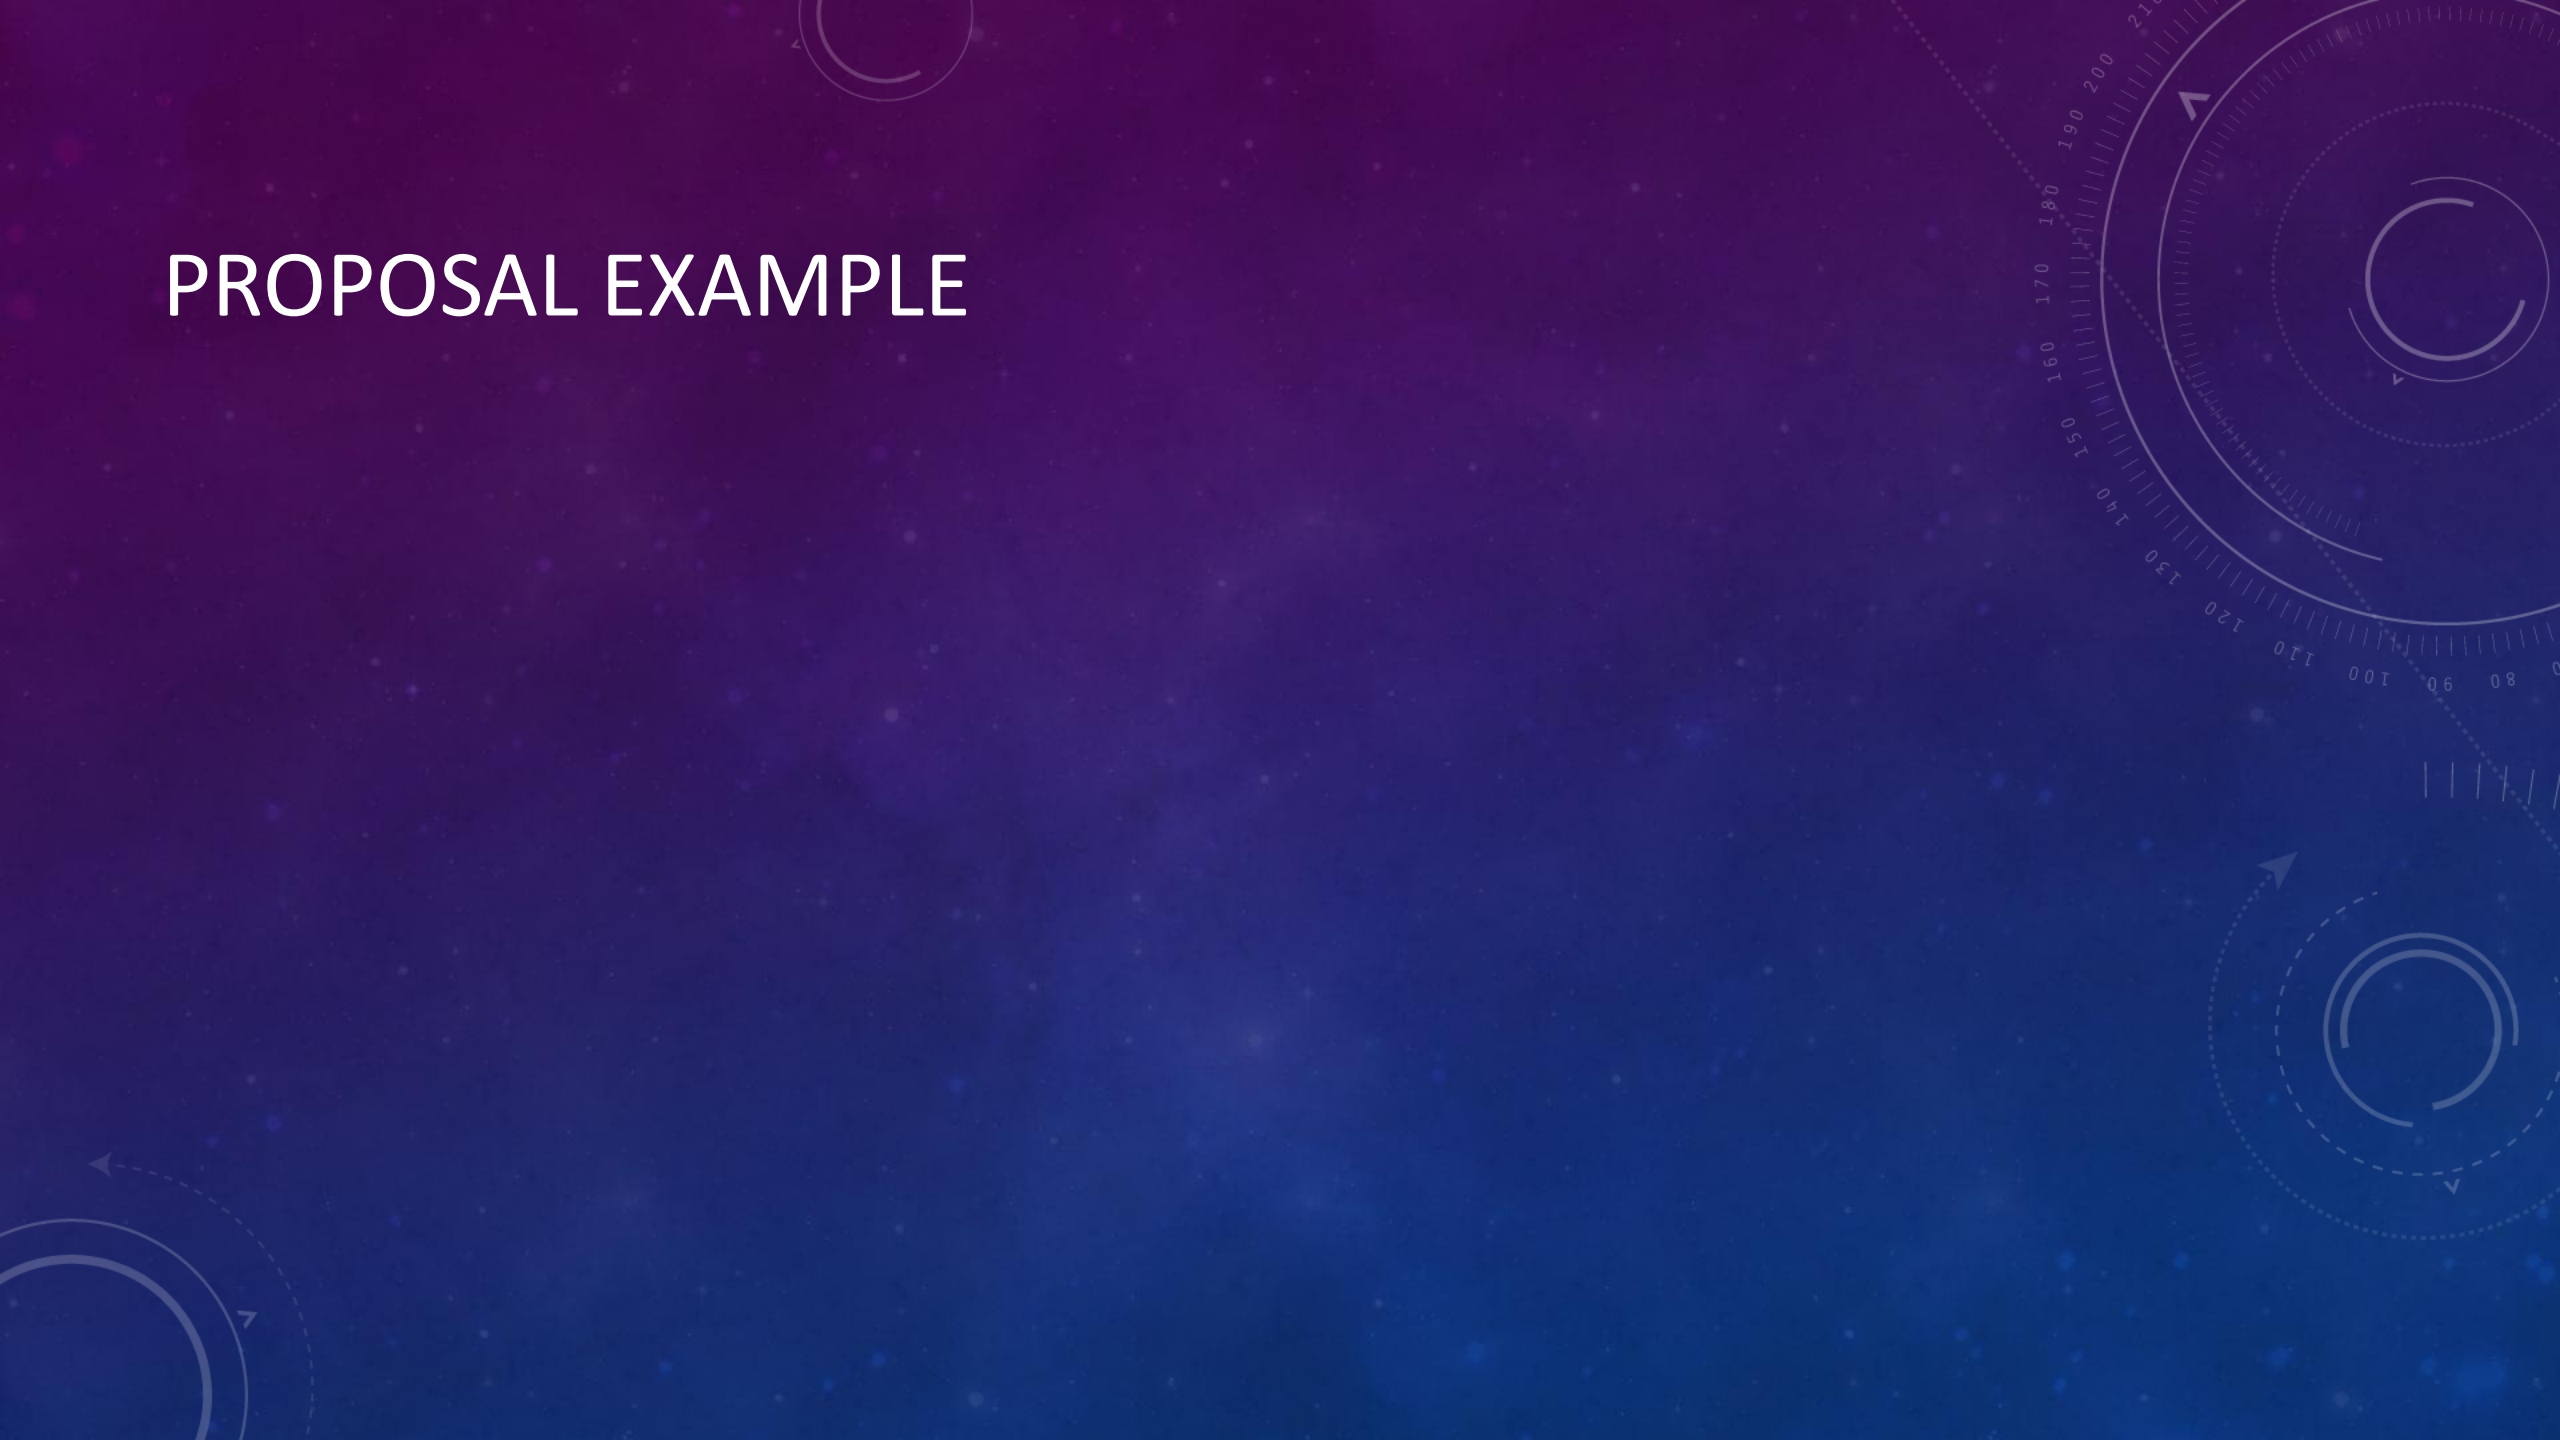

- Explain clearly how will you manage the development of your proposal project
- Proposal reviewers pay strict attention to this section because here you show that you have the required know – how to bring a project to completion.
- in this section you will present the following information:
 - Time table / Giant Chart
 - Required facilities and resources
 - Materials and equipment
 - Personals (includes resumes)

- 
- ✓ Include a work plan, sometime called a project plan, as a separate section in all lengthy proposals.
 - ✓ Preliminary projects plans are also sometimes appropriate in feasibility and recommendation reports.
 - ✓ In addition, most progress reports refer to all of part of previously existing project plans.

END MATTER OF PROPOSAL

- Bibliography
- Resumes
- Appendices (additional information's)

PROPOSAL EXAMPLE

EXTERNAL COMMUNICATION

- Letters
