

EMPOWERING INDUSTRIES THROUGH OCCUPATIONAL HEALTH AND SAFETY

PREPARED BY: ENGR. MUHAMMAD KHURAM YOUSAF (GRAD-IOSH)

I) IMPORTANCE OF HEALTH AND SAFETY

General Perception about Health & Safety:

Generally Students do not have an idea that an HSE Field exists as a professional department in every Industry !

These departments are composed of mechanical, civil, electrical, chemical & environmental engineers mainly.

Hence, HSE is a career path chosen by many after graduation.

I) IMPORTANCE OF HEALTH AND SAFETY

General Perception about Health & Safety:

We see that particularly in the local industry of Pakistan , HSE is considered an additional burden. However, MNCs take occupational safety of their employees as an obligation

Generally , HSE is thought to be limited to these steps only:

PPE

Safety Signage

Industrial

I) IMPORTANCE OF HEALTH AND SAFETY

However, In the following slides, let us look at 3 major incidents which happened due to negligence in HSE Protocols and had a severe impact.

1- Deep Water Horizon Incident (Affectee : British Petroleum)

2- Mecca Crane Collapse (Affectee : Saudi Bin Ladin Group)

3- Piper-Alpha Disaster (Affectee : Occidental Petroleum Limited)

DEEP WATER HORIZON-OIL SPILL

- An Industrial Disaster that began on 20th April, 2010 in the Gulf Of Mexico on the BP operated exploration rig.
- It is considered to be the largest marine oil spill in the petroleum industry. The Incident caused **11** casualties and the rig subsequently sank in the sea.
- The incident was caused due to well blowout which originated due to overlooking of routine daily procedures. Also, defective cementing of the well was identified as a prime cause.
- 210 million US gallons was discharged during the spill and after several failed attempts to contain the flow , the well was declared sealed one month into the disaster.

DEEP WATER HORIZON-OIL SPILL

- The US Environmental Protection Agency temporarily banned British Petroleum (BP) from taking new contracts with the US government.
- Cleanups, penalties, lost contracts and other charges costed the company more than **65 billion\$** ! The spill continues to harm marine life up to date!
- BP, which was among the top resource exploration companies before the incident, had to reorganize assets and shut down their operations from several developing countries to cover up the costs of this incident.

MECCA CRANE COLLAPSE INCIDENT

- 2 weeks before the annual hajj pilgrimage, a huge crawler crane collapsed over the Masjid al Haram in Mecca on 11th September, 2015.
- Number of casualties : **111** Number of Injuries: **394**
- The deadliest crane collapse accident to ever happen in history !
- After the investigation, it was reported that the Incident was caused due to improper securing of the crane boom and wrong positioning of crane during strong winds.
- Saudi-Bin Ladin group was involved in the accident and was suspended from talking any new projects. The compensation costs were close to 300 Million\$. The fines were not made public.

PIPER-ALPHA DISASTER

- Piper-Alpha disaster is considered an important event in revolutionizing Health & safety standards and practices in the Oil & Gas Exploration industry.
- Purely caused by an error in following the HSE Protocols by not adhering to correct Permit-to-work (PTW) systems in maintenance and operation of condensate pumps.
- Caused 167 deaths and costed occidental petroleum around 1.7 billion € making it one of the deadliest and costliest accidents in history.

2) ROLE OF HEALTH AND SAFETY IN INDUSTRY

Occupational Health & Safety

Occupational health and safety (OHS) **relates to health, safety, and welfare issues in the workplace.** OHS includes the laws, standards, and programs that are aimed at making the workplace better for workers, along with co-workers, family members, customers, and other stakeholders

Most Frequently Cited Violations

CLASSIFYING THE INDUSTRY

Process Industry (Fertilizer and Oil&Gas)

Cement & Construction

CLASSIFYING THE INDUSTRY

Process Industry (Fertilizer and Oil&Gas)

- ☐ H2S safety
- ☐ Chemical Safety
- ☐ Fire
- ☐ Electrical
- ☐ Working at Height
- ☐ Confined spaces
- ☐ Manual Handling

Cement & Construction

- ☐ Dust/Alien particles
- ☐ Noise
- ☐ Work at Height
- ☐ Vibrations
- ☐ Manual Handling
- ☐ Fire
- ☐ Excavation

3) UNDERSTANDING HEALTH AND SAFETY PRINCIPLES

An industry needs to manage its workplace due to three major reasons:-

- ☐ **Moral**
- ☐ **Financial**
- ☐ **Legal**

4) ANALYSING PERSONAL COMPETENCE IN TODAY'S INDUSTRY

Personal Competencies

Competence can be described as **the combination of training, skills, experience and knowledge that a person has and their ability to apply them to perform a task safely**. Other factors, such as attitude and physical ability, can also affect someone's competence.

Personal Competencies are evaluated generally using :-

1- KATE

2- CPD Points

5) CAREER DEVELOPMENT IN HEALTH AND SAFETY

International Certifications

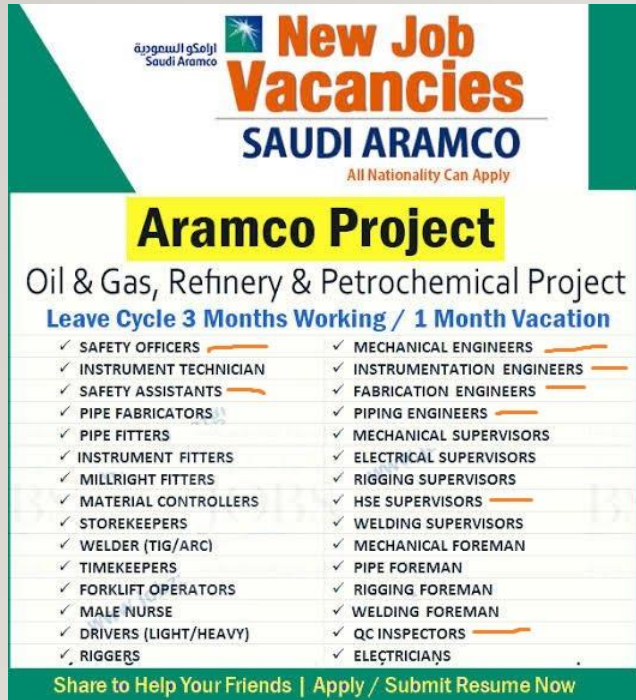

5) CAREER DEVELOPMENT IN HEALTH AND SAFETY

Basic Courses

- ☐ Fire Safety awareness
- ☐ Confined Space Entry
- ☐ Work at Height
- ☐ Approved Risk Assessor
- ☐ First aid at work
- ☐ H₂S Gas safety
