

$$(FF)_{16} = \overbrace{1111\ 1111} = 2^8 = 256$$

$$\begin{matrix} 7 & 6 & 5 & 4 & 3 & 2 & 1 & 0 \\ 2^7 & 2^6 & 2^5 & 2^4 & 2^3 & 2^2 & 2^1 & 2^0 \end{matrix}$$

$$2^7 + 2^6 + 2^5 + 2^4 + 2^3 + 2^2 + 2^1 + 2^0$$

$$128 + 64 + 32 + 16 + 8 + 4 + 2 + 1$$

$$= 255$$

$$\rightarrow 1000\ 0000$$

$$2^7 = 128$$

Assignment:- Write code for arithmetic/logical operations to use each flag of PSW.

- i) your program should change/modify the flag.
- ii) Test the status of the flag.
